RESEARCH AT MANCHESTER METROPOLITAN

We deliver research that addresses some of the biggest challenges facing contemporary society.

Our research focuses on areas of excellence and quality within the University, as independently confirmed by the Research Excellence Framework 2014. Our research falls into four broad subject areas:

- Arts and Humanities
- Education, Business and Social Sciences
- Health and Social Care
- Science and Engineering

For more detailed research opportunities, please visit mmu.ac.uk/research

“The core subject of my study was about the effect of the drug simvastatin on advanced glycation, the main culprit in diabetes. Having completed my PhD, I am now working at the University as an associate lecturer supporting first year students.”

**Dr Nadia Ali, Iraq, MSc
Biomedical Science and PhD**

ENTRY REQUIREMENTS

Academic: You will normally require a UK Master's degree or international equivalent in a discipline related to your proposed research area.

English: Normally IELTS 6.5 overall is required, but some research areas might require a higher level of English. Please contact the relevant research centre or view our English requirements webpage mmu.ac.uk/englishrequirements

ENGLISH LANGUAGE SUPPORT

If you have received a conditional offer and need to improve your English before you start your postgraduate research programme, Manchester Met can help you. Our British Council accredited Language Centre offers pre-sessional English and long-term preparation courses. Courses run from April and throughout the summer for September degree entries and are designed to help you achieve the level of English language proficiency you need to start your programme, without needing to take another IELTS.

TUITION FEES 2020/21

Tuition fees for postgraduate research courses, including PhD, MPhil, Professional Doctorates and Masters by Research, are categorised into tuition fee bands. The tuition fee is determined by the resources required for an applicant's research project.

Applicants will be informed of their tuition fee band when they receive an offer to study at the University.

Please visit our website for more information mmu.ac.uk/study/postgraduate/research-study/phd/fees

SCHOLARSHIPS

For up to date information on available funding, please visit mmu.ac.uk/researchscholarships

HOW TO APPLY

As you will need to include an outline of your research proposal as part of your application, it is recommended that you contact the relevant Research Degree Coordinator first. You should then complete the application form to study for a Research Degree and submit it with the required supporting documents. Contact a Research Degree Coordinator mmu.ac.uk/study/postgraduate/research-study/phd/finding-a-supervisor

Please note, some faculties have four enrolment periods for research degrees – September, January, April and July, but some only offer September and January entry, so please check your options with the relevant Research Degree Coordinator. For further information and guidance on how to successfully apply, please visit mmu.ac.uk/study/postgraduate/research-study/phd/how-to-apply

85% of research has 'world-leading' or 'internationally excellent' impact
