Front cover image: Graphical representation of the University's coat of arms. This symbolises the historical associations of the University with the locality. The triangular gold castle with three towers comes from Exeter's coat of arms and is thought to represent Rougemont Castle as alluded to by the red background. The 15 gold bezants around the edge of the shield are from Cornwall's coat of arms, whilst the green cross on a white background is from Devon County Council's coat of arms. The theme of learning is symbolised by the book with gold edges and a Latin inscription translating roughly as 'We follow the light'.

OUR HISTORY >>

- We've been dedicated to discovery and changing lives through education since **1851** when the Exeter Schools of Art and Science were founded.
- In **1922** we became the University College of the South West.
- In **1955** we became the University of Exeter.
- In **1978** St Luke's College of Education (established 1840) joined us.
- In **1993** Camborne School of Mines in Cornwall (established 1888) merged with us.
- In **2004** we opened the Penryn Campus, expanding the provision of higher education in Cornwall.
- **Today** we're a member of the Russell Group, recognised for both our research and teaching excellence.

We're still dedicated to discovery.
We're still changing lives through education.
We can change yours.

Streatham Campus, early 1970s

COMMITTED TO YOU >

We're dedicated to your future

Covid-19 has changed the world dramatically, and although at the time of writing safe and effective vaccines are being rolled out, we do not know how the pandemic will continue to affect our lives in the future.

What we do know is that we are absolutely committed to your education, health and wellbeing. We have taken significant and effective steps against Covid-19, both in our student and academic communities on our campuses and via our crucial research into the disease and how to treat it.

We cannot say exactly what life will be like at the University of Exeter in 2022 when you come to study with us – whether you will need to wear masks or how we will deliver your teaching – but we can guarantee that we will do our best to make you feel safe, valued and able to flourish no matter what circumstances we may find ourselves in.

Steps we've taken already

We've taken serious measures to help our students follow guidelines and keep safe since the pandemic began, including:

- Providing tests on campus for students and staff
- Delivering food packages to isolating students
- Providing online 'boredom-buster' packages, with free subscriptions for films, etc.
- Supporting students isolating in accommodation during holidays, with key services all available
- Developing online schemes connecting isolating students

- Providing significant additional wellbeing support, with welfare teams to talk to
- Expanding IT support to help online learning.

A safe learning environment

We won't let Covid-19 get in the way of your educational experience. Flexibility is key to this, and wherever we can and when it is safe to do so, we will offer face-to-face teaching on our campuses. Our aim is to ensure you continue to receive the exceptional education that you expect. This incorporates different ways of learning, and allows you to switch easily between structured, on-campus and online learning as needed. You will have access to your tutors, as well as our Covid-19 secure campus, your circle of friends and the support you need from the university community.

Helping to tackle the virus

We've been at the heart of the Covid-19 response through our research expertise, working closely with the NHS, Public Health England, councils and other bodies to tackle the virus and support economic recovery. Our research into Covid-19 has covered analysis of clinical data to aid treatments, and understanding the economic and social impacts of the pandemic around the world so we can aid the global recovery.

The University has been great at keeping us informed with regular emails, and they have been very open about what's going on. They supported us with being able to defer exams till the summer, which is really great.

Evie, studying History.

The University has definitely supported me during the pandemic. As a result of Covid-19 my family and I experienced financial difficulties, but I received a Pandemic Hardship Fund from Exeter, which really helped. The application was quick and easy and put no stress on me. Even now I can reapply if I find myself in that situation again; it's nice to know I can get more support if I need it.

The quality of teaching is still there and we still have the chance to ask our lecturers questions. I'm more engaged this year and I feel like I'm getting more done due to the amount of online resources we now have. We have pre-recorded lectures and still have online seminars where we get the chance to ask questions and discuss topics.

Ernestina, studying LLB Law with Business.

The University has put a lot of mental health support in place during the pandemic. The Wellbeing Team was great at supporting me whether it was on the academic side, getting extensions for work, or on a counselling side just talking through any issues that have come up.

Ellie, studying Philosophy.

I've seen how much work has gone into the learning platform, so I appreciate there are advantages and disadvantages. The learning platform is much more organised than before, you have everything in one place – the lectures and slides, the forums where you can ask questions – and you have the flexibility if you can't attend the lecture, and for international students I think that's really beneficial. It was a good experience studying online.

Constantine from Romania, studying Business and Management.

Student quotes taken in January 2021.

THE SOUTH WEST >

With beautiful, green campuses in Devon and Cornwall, we're a university of the whole South West. Our campuses offer a mix of historic buildings and modern facilities, but there's plenty more to explore on the doorstep – including beautiful beaches, spectacular countryside, and exciting culture, food and arts.

Exeter and Devon

With fabulous coastline and national parks, Devon is consistently recognised as offering the best quality of life in the country.

Could there be a more perfectly located city? It has two national parks and plenty of coastline on the doorstep.

Top 10 places to live 2017,

OUR COMMUNITY >

By coming to study with us you'll be joining a student community of more than 27,000 people at three campuses across the South West. Our students are some of the most satisfied in the UK – they consistently rate us highly for overall student satisfaction in the National Student Survey – and come from all around the world and from every conceivable background.

Whether you're based at Penryn, St Luke's or Streatham, you'll find the same thing – engaged, inclusive and safe communities of people who come together around shared interests and values. What brings you together could be that you live in the same halls, study the same course, worship at the same place, belong to the same society or sports club – or just that you keep bumping into each other in the library or a cafe.

Joining us from abroad

If you're joining us from outside the UK we will help make your journey as smooth as possible. We make regular visits to schools and education exhibitions abroad where we can answer questions and help you apply. We run airport pick-up and international buddy schemes to help you get to campus safely and settle in. We also guarantee accommodation to unaccompanied first-year international students.

 Outside The Exchange, Penryn Campus

I got into the University of Exeter through clearing. Studying BEng Energy Engineering in Penryn, Cornwall, has been a great experience, including beautiful scenery, helpful and supportive staff, friendly locals, hundreds of interesting activities – off and on campus – and much more.

Lecturers and support staff are easy to approach and willing to help, which has helped me get the most out of university life. Not only I have I learnt a huge amount, but I also have had some wonderful experiences both academically and socially. Every single activity and lesson has made me more confident and strengthened my skills, from being a society committee member to an intern on campus.

Pimonpan

from Thailand studied Energy Engineering at the Penryn Campus. She graduated in 2020 and started working as a KTP associate with the University of Exeter and an SME company in Penryn called Inyanga Marine Project.

OUR RESEARCH >

We don't just teach; we also research. This could be experiments in a lab if you're a physicist, or observations in the field if you're a bioscientist. Social scientists might examine large data sets to understand behavioural patterns, and humanities researchers might interrogate ancient manuscripts. There are as many ways of researching as there are researchers.

98%

98% of our research is rated as world leading or internationally recognised. ¹

9th

Ranked 9th in Europe for scientific performance by CWTS Leiden. ²

**RUSSELL
GROUP**

A Russell Group research-intensive university.

Our research is at the heart of what we do – it creates the textbooks you study and the lectures you attend, so you're always engaging with the latest thinking and discoveries. Our climate change and sustainability research is amongst the most cited and influential in the world, but we also have expertise in fields as diverse as:

- anti-microbial resistance
- diabetes and dementia
- identities and beliefs
- the future of work.

You might even get to help make those discoveries yourself – many of our undergraduate students have the chance to become part of a research project in their final year, giving a taste of what a Masters or PhD could be like.

Recent research

- shaping the global response to antimicrobial resistance in the water
- using drone surveys and computer modelling to plot extreme arctic erosion
- developing an app that uses AI to detect, prevent and treat mental health
- creating the biggest divorce law reform for 50 years: 'no fault' divorce
- developing a 7-point plan to battle the climate emergency via economic reform
- identifying Positive Tipping Points to solve the climate crisis, helping to regenerate ecosystems and sustain the electric vehicle revolution
- use of virtual reality headsets in living well with dementia.

Find out more about our research: exeter.ac.uk/research ↗

¹ REF 2014. ² Leiden Ranking 2018, based on percentage of outputs in top 10 most cited.

I'm a bit like an environmental detective, investigating relationships between humans and the environment, or looking for evidence of environmental change.

I am pioneering new techniques to find environmental 'tracers' in a range of different samples, and I've been involved in lots of exciting projects. These include classifying biomarkers in ice cores from Antarctica, identifying microparticles and plastics in fatbergs, reconstructing air pollution histories in Chinese megacities and characterising the growth of microorganisms for biofuels research.

I fell in love with research whilst completing my undergraduate dissertation project – a key moment that has shaped my career as a Postdoctoral Research Fellow. An important part of my research has been to assess how air pollution has changed since the Industrial Revolution in Merseyside using records from urban ponds. I have seen first-hand the impact humans have on air quality, and how there has been a sharp rise in pollution from fossil fuels over the last few decades.

My research has made me passionate about reducing my own personal environmental impact and I now live in a tiny-off grid house with my family. A firm supporter of the current social movement for climate action, I'm proud to work here. The University has declared a climate emergency and is committed to protecting the environment for all our futures.

Dr Ann Power

Postdoctoral Research Fellow,
The BioEconomy Centre, Biosciences.

Reed Hall Gardens, Streatham Campus

It was fantastic to be welcomed as a mature student with a university as prestigious as Exeter. The lifestyle and learning methods here perfectly suited me.

Liz, studying Environmental Science at our Penryn Campus.

Penryn Campus library

YOUR EDUCATION >

A university education isn't about being taught – it's about directing your own learning and taking an active part in creating knowledge.

Excellence in teaching and research

We are one of very few UK universities to be both a member of the prestigious Russell Group and have a gold award from the Teaching Excellence Framework (TEF), evidence of our established international reputation for excellence in both teaching and research.

Working together

We support all of our students, irrespective of background, in helping them succeed and realise extraordinary ambitions. To do this we work together, within a diverse and international community, to equip you with the skills and attitude you need. In return we ask you to challenge yourself – and us – intellectually at every step.

There are multiple opportunities to work with us to improve your education experience, via Student-Staff Liaison Committees, change projects and more.

An international education

Interacting with people from different cultures and backgrounds is a crucial part of university education. Our international learning community and study and work abroad schemes give you meaningful opportunities to engage with new perspectives, ideas and challenges, helping you become more accepting, more informed and more able to fulfil your potential.

By graduation you will be a proactive, resilient and creative critical thinker, ready to make a positive difference to the world.

How we teach and how you learn

University is different to school, and depending on your course you may learn in ways you've never experienced before. These are just a few:

LECTURE	Presentation or talk on a particular topic. Can be interactive and forms a basis for further reading, questioning and thought.
SEMINAR	Classroom session focused on a particular topic or project. Typically involves guided discussion in a smaller group than a lecture.
TUTORIAL	One-to-one or small group meeting with your tutor involving supervision, feedback or detailed discussion on a topic, project or piece of work.
WORKSHOP	Practical application of a particular skill or technique. Examples include a laboratory class, artefact handling, language conversation or sports match.
FIELDWORK	Practical work conducted at an external site. Examples include survey work, data collection, excavations and explorations.
SELF-DIRECTED LEARNING	Private reading, informal discussion groups and other forms of self-directed studying will make up a significant amount of your learning.

Find out more: exeter.ac.uk/undergraduate/study 

YOUR EDUCATION >>

Expand your horizons

Studying with us can take you much further than Exeter and Penryn. Field trips and opportunities to study or work abroad are a key feature of many of our degrees, and we're committed to providing opportunities to expand your horizons whatever the circumstances.

Study / work abroad

A placement year abroad – either working or studying – as part of your degree can help you develop a range of valuable skills. You could pick up a new language, learn about different cultures and make lifelong friends. Many destinations are in English speaking countries or universities, so you don't necessarily need to know another language.

Field trips

Fieldwork is an essential part of many of our degrees, and an exciting optional extra for many others. Whether you're exploring reserves in South

Africa, conducting archaeological digs in Romania or taking advantage of the living laboratory on our doorstep in the South West, our students can be found doing fascinating things in all sorts of locations. You can find full details of field trip modules in our online programme pages.

Summer schools

You can also take advantage of international study opportunities during the summer vacation. Last year more than 120 of our students took part in summer schools or other short-term programmes in a wide range of countries.

Kenya Field Course 2017

Find out more: [exeter.ac.uk/studyabroad/outbound](https://www.exeter.ac.uk/studyabroad/outbound) 

I was impressed at how much emphasis the course placed on translating what you've learnt in class into real-world applications through the means of conducting your own field studies on the many field trips built into the course. Because of this, I've had the opportunity to study alpine ecology in Spain and I'm now looking forward to the Galapagos field course in January.

Another aspect of the course that appealed to me was its emphasis on enhancing employability by gaining professional experience with academics. To date, I've worked alongside our academics in exciting places like Cyprus and Borneo. Needless to say, these experiences have been hugely rewarding.

Jeffrey

from Penryn, graduate in Zoology.

YOUR EDUCATION >

Build your own degree

We have several ways that you can shape your degree, from multidisciplinary courses like Liberal Arts and Natural Sciences, to the opportunity to study modules from outside your main subject.

Flexible Combined Honours (FCH)

FCH lets you combine any two or even three subjects from across the entire university, as long as they can be timetabled together and you meet any entry criteria. You can choose how you split your credits between each subject and build your own bespoke degree. What you choose to study determines the exact wording on your degree certificate when you graduate. See pages 94–95.

Liberal Arts and Natural Sciences

Our two flagship multidisciplinary programmes let you study complementary subjects. In Liberal Arts you choose a major from the humanities or social sciences, and core Liberal Arts modules introduce real-world issues and skills that cut across disciplines. Natural Sciences gives you a foundation across the sciences before allowing you to specialise. See pages 104–105 (Liberal Arts) and pages 116–117 (Natural Sciences).

Free-choice modules

You can usually study up to 30 credits outside of your subject each year – out of 120 total – assuming timetabling works and you meet any necessary criteria. You could add a Marketing module to your English degree, drop some Philosophy into Computer Science or study a new language – it's completely up to you.

Foreign Language Centre (FLC)

The FLC offers daytime credit-bearing language modules that you can integrate into your degree and evening language courses you can study alongside your degree. Some of these courses offer an accreditation, allowing you to gain an additional qualification on top of your degree.

Find out more: [exeter.ac.uk/humanities/flc](https://www.exeter.ac.uk/humanities/flc)

Work experience and study abroad

Many of our degrees offer 'year abroad' options. These give you either a professional work placement or a year's study at one of our prestigious international partner universities. Usually taken during your third year of study, this additional year will provide you with valuable skills attractive to global employers. Many work placements are also available in the UK.

See individual course pages online for details: [exeter.ac.uk/undergraduate/courses](https://www.exeter.ac.uk/undergraduate/courses)

Forum Expo Lab, Streeham Campus

YOUR EDUCATION >>

Helping you study

We constantly work with our students and assess developments and trends in studying and learning techniques so we can keep our studying resources and spaces modern and functional.

Libraries

We have dedicated libraries on all our campuses, and our Streatham and Penryn libraries are usually open 24/7 during term time. We have more than 1 million printed books across our campuses. And this is just the tip of the iceberg – we have even more digital resources than physical books, and our collections are expanding all the time. We also manage several internationally important collections of manuscripts and rare items via our Special Collections and The Bill Douglas Cinema Museum.

Find out more: exeter.ac.uk/library

Learning spaces

For our students who prefer to study on campus, we provide quiet and group study spaces across our campuses. Most of our major academic buildings have study spaces and computer rooms available, with wifi and power sockets.

Facilities

Each of our subjects maintains the highest level of specific learning facilities – from

rehearsal studios and costume collections for Drama, to laboratories and clean rooms for sciences.

Find out more on our individual subject websites: exeter.ac.uk/undergraduate/courses

IT services

From the iExeter mobile app and student portal – where you can access your timetable, email, library account and much more – to our high-speed wired and wireless network across our campuses and halls of residence, we make sure you have all the IT support you need to succeed.

Digital learning

We offer a high quality digital learning experience, providing the flexibility to study wherever you are.

We'll support you to get the most out of our learning technologies: our Digital Hub is available online and in-person at our Streatham and Penryn campuses. You can use the Digital Hub to brush up on your digital know-how and get to grips with new tech through bitesize videos, written guides and real-time help with an expert.

I did a lot of research when it came to choosing which universities I wanted to apply to and Exeter really stood out. It allowed me to do a combined honours course, both sides of which had some of the best teaching reputations in the UK.

Zoe, studying English and Film at our Streatham Campus.

Find out more: exeter.ac.uk/undergraduate/study 

I'm from Houston, Texas, and did a Classics degree in Austin before teaching English in the Middle East and then doing my Masters and PhD in Australia. My work steadily got more political and I'm now a feminist philosopher in the Politics department. My work is about what has to happen to make women politically active. This gets left out of feminism because we can go straight for the political, but the personal is crucial.

My classes are a community. A lot of my pedagogy is quite conservative – I love reading books, taking my time – but I also like to disrupt expectations. I get my classes to paint, to watch difficult films together and talk about them afterwards, to examine their privileges. I encourage students to realise they're not so cool, not so polished, they're just a person, and so is everyone else, and it's okay to be vulnerable. It's about creating a space where it's okay to make mistakes and learn from them. Nobody starts with a well-informed, fully articulated view – to get to a place of political action you have to be wrong, you have to talk your way through stuff with other people.

I know students won't remember every detail I teach. They don't need to know everything that Simone de Beauvoir said to get a job. What they learn from me, I hope, is how to move about the world more ethically, how to consider others more carefully, and ultimately how to trust themselves.

Dr Sarah Drews Lucas

Lecturer in Political Theory,
Students' Guild Lecturer of the Year 2019.

SUPPORTING YOU >

Getting used to life at university is exciting, but it can also be challenging. Whatever your situation, and whatever help you need, we are here to support you.

Students with disabilities

We support students with chronic medical conditions, physical or sensory impairments, mental health difficulties and learning difficulties.

Care-experienced students

We work with young people, carers, foster families, social services, virtual schools and organisations to support progression to HE.

Students without family support

We've proudly taken the Stand Alone Pledge to provide support for students who are estranged from their families.

Mature students

Anyone starting a degree over the age of 21 is a mature student. We welcome applicants not coming to us directly from school or college, and who may be returning to education.

Student carers

We have several initiatives to support students with caring responsibilities, including financial assistance and academic and career support.

Asylum seekers and refugees

We're proud to welcome asylum seekers and refugees to study with us, and we offer financial assistance including the Sanctuary Scholarship.

LGBTQ+

We support equality and diversity at all our campuses through LGBTQ+ and pride societies, and our LGBTQ+ Staff Network.

Faith and religion

We welcome students, staff and visitors from all faith backgrounds, as well as those from none. We support different lifestyles and promote mutual respect and tolerance.

Find out more: exeter.ac.uk/students/wp-support 

Queen's Cafe, Streatham Campus

Exeter was a university that stood out. I first came here for an Exeter Scholars summer school in Year 10, as my school qualified under widening participation. I was also fortunate enough to receive a contextual offer, coming from a low income single-parent family and from an area of low participation in higher education.

Experiencing the campus on open days told me this was the university for me. I remember that the University took an active interest in me as a student, which put me at ease instantly. My advice to others is to visit Exeter!

As leading academics in their field, the University's lecturers have never failed to engage me. From looking at medieval manuscripts housed in the University library to travelling to historical archives in London, History at the University of Exeter has been a truly immersive experience.

Being a first-generation university student, I was worried about fitting in at university and making friends. However, the chance to be a student ambassador, a committee member for two societies and even to play table tennis for the University has helped me make some incredible friends and has made for an unforgettable experience more diverse than I could ever imagine.

Conor

from Swindon, graduate in History,
Streatham Campus.

YOUR FUTURE >>

Your career

Our students come from all kinds of backgrounds and have gone on to be politicians, pop stars, activists, scientists, entrepreneurs, judges, writers and more. Building a better life is one of the key reasons for going to university. We will help you gain the skills and experience to compete in the global job market or go on to Masters or PhD study – whichever you want to do.

Our degrees are designed to stimulate creativity, entrepreneurship, a global outlook, leadership, teamwork, analytical skills, resilience and imagination – all qualities employers are looking for.

Our dedicated careers service has won national awards for its work to help you get the career you want after you graduate. Our support and services include:

- careers information, advice and guidance
- multiple careers fairs, including industry-specific fairs
- work placements at home and abroad
- social enterprise and student entrepreneur support to start your own business
- award-winning sector specific work experience and training schemes.

We also offer:

- employability modules in degrees
- interview guidance and coaching
- psychometric testing – to find out what kind of job suits you
- employer presentations and mentoring
- CV and job application guidance
- skills sessions
- career and personal development workshops
- extensive careers library and online resources
- alumni careers networking and events.

If you're not sure what you want to do, we can help you figure that out when the time is right – our careers services are available forever after you graduate: exeter.ac.uk/study/careers

We work with over 9,000 active organisations / employers.

90% of graduates in or due to start employment or further study 15 months after graduation.¹

95% of students undertake some type of work experience during their time with us.

TOP 100

A top 100 institution in the QS World University Rankings for employer reputation.

¹ HESA Graduate Outcomes Survey 2017/18.

Language training

Our Foreign Language Centre – at our Streatham and Penryn campuses – can help you learn or improve your language skills. Our courses include daytime undergraduate modules as part of your degree and certified evening classes (at Streatham). You can learn a language from scratch or develop one you've studied previously.

Streatham: British Sign Language // French // German // Italian // Japanese // Korean // Mandarin Chinese // Spanish.

Penryn: French // Spanish // Chinese // German (subject to demand).

Graduation, Streatham Campus

I'm a fast-streamer in the Civil Service, and the Fast Stream is a development programme run by the government to nurture people with ambition, enterprise and potential to become future leaders. I'm a generalist, which means I've done three different roles on the scheme; operational, policy and corporate. I've worked in the Cabinet Office, Foreign Office and HMRC, and advised on higher education policy between the UK and Tunisia, the country my parents are from.

I studied Politics and International Studies at Penryn, the most beautiful campus in the country, and where I met my wife. My lecturers and tutors emphasised that the world is out there to be changed, and that was planted in me on my very first day. Given the intimate settings you have on your course, where lectures feel like seminars and seminars feel like small coffee breaks, that really helps in life in government where you're in an intimate setting with ministers, advising them on the most important policy changes that need to be made to better society.

I am the ambassador for the Civil Service Fast Stream, and as part of my role I went back to the Penryn Campus where I studied to deliver a guest lecture on what it's like to work in the Civil Service and in government. I spoke to students and ran through mock assessment centres, what my day is like, and how to best prepare themselves for life in government.

Oussama

from London, graduated in Politics and International Studies at our Penryn Campus, 2016.

Oussama is a Policy Advisor in the EU Member State Engagement Team.

Cross Keys, St Luke's Campus

STUDENT LIFE >>

Your experience at university is about much more than studying. Societies, sports, student media and nightlife are some of the activities that people talk about most enthusiastically. You might also be living away from home for the first time, so cooking, cleaning, laundry and looking after yourself are just as important if you're going to get the most out of university.

Whichever of our campuses you study at, you'll have lots of opportunities to try new things, develop existing hobbies and skills, or do more of what you love. Your university experience can be anything you want it to be.

The next few pages show you a little bit of what it's like to study with us in Devon and Cornwall – where you might live, the societies you could join, and much more.

Meet our students	36	Wellbeing	42
Your Students' Unions	38	Entertainment and culture	44
Sport	40	Accommodation	46

Our students are some of the most satisfied in the UK – their opinions about the quality of their experience consistently rate us highly for overall student satisfaction in the National Student Survey.

Find out more: exeter.ac.uk/study/life >

Hello! My name is Molly. I am one of the University of Exeter's most recent alumni, having graduated as a doctor from my back garden just three weeks ago! You join me at a very exciting time, as later this week I will be starting work in the NHS as a junior doctor, three months earlier than planned, in order to help out at this very challenging time.

Molly, graduate in Medicine (BMBS).
May 2020.

I joined @exebenchball in the Freshers' Week last year. I just got addicted to it after the taster session. It is the best way to relieve stress after surviving a tough week (because most training sessions are Fridays). Actually, this is my first time representing the Uni to participate in competitions! The University of Exeter provides lots of extracurricular activities for students to join. Never be afraid of trying new things.

Jacky, studying Management with Marketing.
August 2020.

A fact about me: I was actually going to study Fine Art, but decided on Maths at the last minute. So being the Creative Director of @exetera (student-led magazine) allows me to fulfill my passions! I am the Co-Welfare Secretary of @euwbc and present my own radio show for the University! There's so many opportunities to do really great things in EX4, so my advice – **get involved!** Go for it and immerse yourself in new opportunities that will benefit you, others, your future and that **make you happy.**

Scarlett, studying Mathematics.
September 2020.

When moving to study at the Penryn Campus, I decided to move to the city of Truro, roughly 8 miles from campus and easily accessible via bus or train. Truro was perfect for me, in commuting to Uni as well as being central to Cornwall enabling me to have access to many of Cornwall's idyllic coastal walks, beaches and attractions. Most students live in Penryn and Falmouth, due to their proximity to campus and student night life, but it's ok to be different and prefer the quiet life.

Zac, studying Zoology.
May 2020.

STUDENT LIFE >>

Exeter Students' Guild

The Students' Guild is your students' union in Exeter and is central to student life. You're automatically a member of the Guild from the moment you register as a student, so make sure you take advantage of all the opportunities on offer.

STUDENTS' GUILD

Representation

All students have a say in running the Guild, and any student can stand to be elected as a representative or an Officer (like the Guild President and Vice Presidents). Student-led representation is vital to drive change and make sure students' voices are heard.

Societies and activities

The Guild helps our students run more than 250 societies from Harry Potter to climbing, snow sports to board games. There's even a society for playing hide and seek! XPression FM, XTV, Razz Magazine and Exposé – our student paper – all give you the chance to get experience in student media too.

Student advice and support

University can be an amazing experience, but things don't always go to plan. You might need some advice, information on your rights, or help in finding support for the circumstances you face. The independent Advice Service offers a range of confidential and impartial help.

Fundraising and volunteering

Dedicating time to charitable causes helps you give something back to the local community, and the Guild is keen to help you help others. We have over 10 fundraising groups raising money for a range of local, national and international causes.

Find out more about your Students' Guild: exeterguild.org

The Falmouth and Exeter Students' Union

The Falmouth and Exeter Students' Union (the SU) represents all students based in Cornwall, from both Falmouth and Exeter universities. You automatically become a member when you register as a student.

THE STUDENTS' UNION

Representation

The SU has a team of four student presidents – one each representing Falmouth and Exeter, and joint presidents for Welfare & Inclusivity and Student Experience. This ensures everyone is represented and included.

Societies and activities

There are more than 150 sports clubs and societies you can join at Penryn. You can get involved with everything from societies relating to your studies to something a bit more unusual, such as Parkour, Pokémon or Public Speaking.

Fundraising and volunteering

RAD stands for Raise and Donate, and that's exactly what we support you to do – raise for local, national and internationally recognised charities. The SU also provides opportunities for you to volunteer in Cornwall, allowing you to try new experiences, develop skills and make a difference.

Events

When people think of a students' union it's more than likely that the first word that comes to mind is events – and we put on some absolute crackers! On top of the outstanding Freshers' programme we also host some pretty incredible events throughout the year – as do our brilliant student groups.

Advice

The SU Advice Service's primary role is to deliver free, confidential, impartial advice and guidance to all University of Exeter, Cornwall and Falmouth University students.

Find out more about our Falmouth and Exeter Students' Union:
thesu.org.uk

The Ram Bar, Streatham Campus

STUDENT LIFE >>

Sport

Sport is an important part of the student experience, and we believe sport and wellness should be embedded in student life. We're the #1 sports university in the south of England and Wales, and we consistently finish top 10 in the British Universities and Colleges Sport (BUCS) rankings each year. Our sports societies and fitness classes offer something for everyone, from yoga and Balletfit to Ultimate Frisbee and jui-jitsu.

Penryn

Sport at Penryn is a lot about surfing and sailing – Cornwall is one of the best locations in the country for watersports. Beyond the waves there is a huge range of sporting opportunities available through the SU, including various clubs (from Quidditch to Cornish Shinty), ranging from competitive to recreational and social. Many teams play in local leagues as well as university competitions. The Students' Union is registered with BUCS, and the Sports Bursary Scheme provides additional funding for students with exceptional sporting talent.

Facilities

- Four-court sports hall
- Exercise studio
- 90-station gym
- Outdoor gym equipment
- All-weather multi-use games area

Sports Park, Streatham Campus

Exeter

From performance programmes for elite athletes to intramural sports leagues for those who want to play casually, there's something for everyone in Exeter. We have 50 sports clubs to choose from, from rugby to sailing,

water polo to taekwondo. There are also coaching and volunteering opportunities that can enhance your involvement within sports and your CV.

Facilities

- 200+ station fitness centre at our Streatham Campus
- 30+ station gym at our St Luke's Campus
- Water-based hockey pitch
- Sand-based all-weather surface and a 3G rubber-crumb multi-sport pitch
- Exeter Tennis Centre
- Devon Cricket Centre
- 4 squash courts
- Short-course golf practice area
- Outdoor 25 metre pool
- Indoor 23 metre pool (St Luke's Sports Centre)
- Performance analysis suite
- Boat house on Exeter canal
- Multi-games grass pitches

Performance Programme

Our Performance Programme gives assistance to top level student athletes in our Performance Sports: Rugby Union // Hockey // Cricket // Golf // Netball // Tennis // Sailing

Scholarships

Our Sports Scholarship Scheme is one of the best in the UK. It provides a comprehensive package of support and financial benefits of up to £5,500 to help meet the needs of individual athletes.

Find out more:

exeter.ac.uk/sport/studentsport/scholarshipsandperformancesport

I'm an international track cyclist so being able to combine studying with sport was crucial. The University does a lot to keep athletes in sport whilst studying. They work around my training regime and provide financial support so I can race internationally. Academic staff are just as enthusiastic; ultimately you gain skills that you wouldn't in everyday life.

Sylvi from Hereford, studying Medicine.

STUDENT LIFE >>

Your wellbeing

We care deeply about the health and wellbeing of every student. From helping you through mentally and emotionally challenging times like Covid-19, to ensuring that you have the learning support in place from the moment you start your degree, and we are committed to supporting you throughout your studies.

Wellbeing Centre, Streatham Campus

Personal tutor

Primarily there to offer academic guidance, your personal tutor can also give you pastoral support and direct you to specialist services if you need them.

Healthcare

While studying with us you should register with a general practitioner (GP). Streatham and Penryn both have provision on campus from local doctors, and St Luke's is served by the nearby Heavitree Health Practice.

Disability support

We aim to do all we can to help you participate fully in your studies. We strongly encourage you to declare any disabilities on your application form so we can get in touch and plan your support before you arrive – this doesn't affect your application.

We can explore how your health and disability may impact your course and university life. This can include helping you apply for funding, such as Disabled Students Allowance. We can also help consider any adjustments you may need and help you in creating an Individual Learning Plan for your study needs.

Emotional and mental health support

We offer a range of advice and support including self-help, workshops, counselling and cognitive behavioural therapy (CBT) to students at our all our campuses.

Childcare

Owlets (Streatham Campus) and Little Wonders (Penryn Campus) offer nursery places for students and staff with young children.

Exeter: owlets-nursery.co.uk
Penryn: littlewondersnurseries.com/penryn

Religious provision

Our multifaith Chaplaincy provides a welcoming and supportive environment for everyone, at all our campuses, irrespective of faith or background.

Exeter: exeter.ac.uk/chaplaincy
Penryn: fxplus.ac.uk/students/student-services/multifaith-chaplaincy

Impartial advice

The Students' Guild (Exeter) and the Falmouth and Exeter Students' Union (Penryn) both offer independent, confidential and impartial advice and help in response to problems you might have relating to money, housing and academic matters.

Exeter: exeterguild.org/advice
Penryn: thesu.org.uk/advice

Settling in

Our Community Liaison Officer, Student Community Wardens and Residence Life Team are all dedicated to helping you make Exeter your home-from-home. Between them they run activities and offer out-of-hours assistance to help you settle in to both the local community and university accommodation.

STUDENT LIFE >>

Arts, culture, entertainment and going out

There's more to student life than studying – the friends you'll make and the experiences you have outside your classes will help form the person you grow into. You'll find plenty of opportunity to explore music, art, theatre and nightlife no matter which of our campuses you study at.

Our Arts and Culture Strategy places creativity at the heart of all we think, imagine and do together, and works across all of our Colleges and campuses. Our visual arts collection contains works by significant artists including Bridget Riley, Barbara Hepworth and Patrick Heron. Student societies cater for every cultural interest you can imagine and plenty you'll have never heard of.

Exeter

The high proportion of students in Exeter – and its recent designation as one of only five UNESCO Cities of Literature in the UK – makes for a buzzing, creative cultural scene. Independent shops and boutiques are an essential part of the city's character, and local breweries power the city's pubs.

Outdoor events and festivals are regular features, and (literally) underground music venues, a sizeable arts centre and independent theatres ensure there's plenty of potential for great nights out. Add in an award-winning museum, independent galleries, a couple of multiplex cinemas, a selection of lively clubs and pubs, plus a thriving food and restaurant culture, and Exeter punches way above the weight of its population for nights out and cultural activities.

There are two music venues on Streatham Campus – the Great Hall plays host to everyone from the Bournemouth Symphony Orchestra to Blossoms, while the legendary Lemon Grove showcases up-and-coming artists and established cult favourites alike.

On campus

- Northcott Theatre
- The Lemon Grove
- The Great Hall
- Kay House Duryard (student music centre)
- Bill Douglas Cinema Museum
- Sculpture Walk
- Visual Arts Collection

In the city

- Picturehouse, Vue and Odeon cinemas
- Exeter Phoenix, multi-artform venue
- Royal Albert Memorial Museum
- The Cavern, music venue
- Barnfield Theatre, Cygnet Theatre
- Maketank, a performance making space

Future Proof Your Body Performance Lab,
Roborough Studios, Streatham Campus

Penryn

The presence of Falmouth University on campus makes for a unique cultural student experience in Penryn. Their Academy of Music and Theatre Arts (AMATA) presents comedy, theatre, music and dance performances. The Stannary is the campus's social hub, and one of Cornwall's best venues, hosting gigs and club nights.

Falmouth itself has plenty of bars, restaurants and a lively cafe culture. It's become the heart of Cornwall's creative scene, with studios, galleries and live music. The Poly – in an iconic listed building – showcases film, theatre and comedy. Falmouth Art Gallery has a busy calendar, and the National Maritime Museum, Cornwall celebrates the influence of the sea on history and culture.

Slightly further afield, the Minack is a unique theatre set in the cliffs high above the Atlantic Ocean, while Tate St Ives showcases some of the best-loved British artworks of the 20th Century.

The Eden Project hosts outdoor concerts each summer by artists like the Chemical Brothers, Foals and Kylie Minogue. Boardmasters in Newquay combines great music with a world-class surfing competition, and the Masked Ball is a unique, immersive party in the quintessential Cornish fishing village of Porthleven.

On campus

- The Stannary
- Academy of Music and Theatre Arts

In the area

- Phoenix Cinema, Falmouth
- The Poly, Falmouth
- Minack, Porthcurno
- Eden Sessions
- Princess Pavilion, Falmouth
- Hall for Cornwall, Truro
- Tate St Ives
- Sea Shanty Festival, Falmouth
- Oyster Festival, Falmouth

Exeter

Our rooms

- Catered or self-catered
- Standard, en-suite or studio rooms
- On and off campus

Self-catered accommodation in Exeter is normally arranged in flats or townhouses for 3 to 12 people, with kitchens and dining areas, and sometimes communal lounges.

Convenient locations

All our accommodation is either on campus or in the city, a maximum 30-minute walk away.

All-inclusive

Your weekly fee includes all utility bills, contents insurance, wifi, welfare support from our Residence Life Team, repair services, 24/7 security

and meals in catered halls. You will have access to a laundry (charges apply), bike storage and social spaces in many of our residences.

Applying

If you pick a course with us in Exeter as your firm choice, you can apply online from the middle of April in the year your course starts.

Sample prices (for 2020/21)

TYPE OF ROOM	CONTRACT LENGTH	TYPICAL ANNUAL COST
Catered – single	32 weeks	£6,058 to £8,491
Catered – shared	32 weeks	£5,627
Self-catered – single	40/42 weeks	£4,782 to £7,200

Penryn

Our rooms

- Shared en-suite
- Single en-suite
- En-suite studio with kitchenette
- Catered halls

Our Penryn accommodation is normally arranged in flats for four to nine students with kitchens, dining areas and sometimes communal lounges.

Convenient locations

Accommodation is located on-campus or a 15-minute walk away in Penryn. There is also the option to apply for halls in Falmouth, a short bus ride away.

All-inclusive

Your weekly fee includes utility bills ¹, contents insurance, wifi, social events delivered by our ResLife Team, welfare support from our Living Support Team, repair services, 24/7 security and meals in catered halls. You will have access to a laundry (charges apply) and bike storage.

Prices 2020/21

TYPE OF ROOM	CONTRACT LENGTH	TYPICAL ANNUAL COST
Self-catered – single	40 weeks	£5,429 to £7,880
Self-catered – shared	40 weeks	£4,550
Catered – single	40 weeks (of which 36 are catered)	£7,865
Catered – shared	40 weeks (of which 36 are catered)	£6,350

University-owned, managed or approved accommodation

We partner with approved housing providers in order to offer a wide range of safe, enjoyable accommodation on and off campus. We review our offering annually.

Applying

If you pick a course with us in Penryn as your firm choice, you can apply online from early April in the year your course starts.

¹ In some residences, bills within a given quota are covered and you'll need to 'top up' if you go over this.

Falmouth town centre

YOUR MONEY >

Tuition fees and student loans are always in the news and can change with government policy. Whatever happens, we are committed to attracting and supporting the brightest students, no matter your background.

Because we're determined not to let financial worries put anyone off studying, we offer:

- bursaries to complement government loans for low household income families
- scholarships for exceptional students, sportspeople and those meeting other criteria
- expert funding advice and guidance.

Tuition fees

UK students

In early 2021, when we printed this prospectus, the fee for UK undergraduate students was £9,250. This was the maximum fee allowed by the UK government.

The only exceptions to the standard £9,250 fee are:

- **BMBS Medicine** – The standard tuition fee is applied per year for years one to four. In year five the tuition fees will be paid by the NHS.¹
- **Year Abroad / Year in Industry** – if, as part of your four-year degree programme, you spend a full academic year studying abroad you will pay a reduced fee of £1,385 (or approximately 15 per cent of the maximum fee for that year). If you spend a full year on a work placement (in the UK or abroad) you will pay a reduced fee of £1,850 (or 20 per cent of the maximum fee for that year).²

International and EU students

For students starting in October 2021 our fees differ by subject area:

- BMBS Medicine: £37,000
- Arts, Humanities, and Social Sciences (including Law): £19,500
- Accounting and Finance, Business and Management, and Economics: £18,800
- Engineering, Physics (including Combined Honours Maths and Physics) and Geology: £23,450
- Biosciences, Geography, Medical Sciences (including Nursing), Psychology, and Sport Sciences: £23,800
- Flexible Combined Honours: £20,500
- Mathematics and Computer Science (including Mathematics with Accounting/Economics/ Finance/Management): £21,450.

International and EU tuition fees are subject to change as we work to ensure an outstanding student experience. Our current policy is to increase tuition fees in each year of study in line with CPI (Consumer Price Index).

Keep up to date with changes to tuition fees: exeter.ac.uk/undergraduate/fees

Find out about international study visas: exeter.ac.uk/internationalstudents/applyingforavisa

¹ Under review – assuming current arrangement continues.

² These figures may be subject to small increments set by the government each year and could be subject to change should government policy alter.

YOUR MONEY >>

Government loans

Currently UK students can apply for a loan to cover all tuition fees. This means:

- you won't have to pay your tuition fees in advance
- you only start repaying the loan when your income is over £511 per week or £2,214 per month.

For further details on applying see [gov.uk/apply-online-for-student-finance](https://www.gov.uk/apply-online-for-student-finance)

Maintenance loan

Full-time UK students can apply for a maintenance loan to help with living costs in each year of your degree. The amount you get will depend on your household income. The loan is paid directly into your bank account at the start of each term and will need to be repaid.

Find out more about government loans: [exeter.ac.uk/undergraduate/fees/government-grants](https://www.exeter.ac.uk/undergraduate/fees/government-grants)

Bursaries and scholarships

Bursaries

Bursaries are non-competitive payments intended to help students from disadvantaged backgrounds, or who are having difficulties funding their studies. In 2020 we spent more than £4.3 million on bursaries to support our students.

In 2020 we offered bursaries for:

- UK and EU students with household incomes below £16,000
- care leavers under the age of 25
- students with caring responsibilities
- students without family support.

The government also gives every university funds each year to assist students who need extra financial support because they have higher than expected costs (e.g. single parents).

Scholarships

Scholarships are payments made to support your education, awarded on the basis of merit, personal achievement and academic ability.

Each year we offer a wide range of scholarships, including scholarships for:

- sport – for outstanding students in key sports
- music – choral and organ scholarships
- international students of outstanding academic quality
- students studying abroad
- students from Devon and Cornwall who meet specific criteria.

Specific details of bursaries and scholarships change each year, usually in February (for students starting that October). Stay up to date and find out more, including criteria and awards for individual schemes: [exeter.ac.uk/undergraduate/fees/scholarships](https://www.exeter.ac.uk/undergraduate/fees/scholarships)

Financial advice

Our Student Information Desk (SID) can answer questions and give information about fees and funding. Our Students' Guild Advice Team can offer independent financial advice.

Find out more about both: [exeter.ac.uk/students/finance](https://www.exeter.ac.uk/students/finance)
[exeterguild.org/advice/finances](https://www.exeterguild.org/advice/finances)
[thesu.org.uk/advice/money](https://www.thesu.org.uk/advice/money)

Working while studying

Most students help support themselves by working part-time. We recommend no more than 10–15 hours per week. We can help you find part-time jobs, including opportunities on campus: [exeter.ac.uk/careers/casualjobs](https://www.exeter.ac.uk/careers/casualjobs)

Living costs

Your living expenses mainly include accommodation (unless you live rent-free at home), food, entertainment, books and other study costs. As a rough estimate university is likely to cost you between £9,000 and £12,000 per year (including accommodation costs), depending on your needs and priorities.

You can find more detailed and up-to-date examples of specific living costs: [exeter.ac.uk/undergraduate/money/livingcosts](https://www.exeter.ac.uk/undergraduate/money/livingcosts)

Stepcote Hill, Exeter

YOUR APPLICATION >

How we assess your application

We welcome applications from anyone with the talent, motivation and potential to succeed. Our typical offer includes the likely requirements for your course.

If we make you an offer we may include a guarantee to accept grades slightly below the typical offer if you make us your firm choice.

We do not make unconditional offers unless you have already achieved the results we need.

In considering your application, we take account of:

- your achieved/predicted academic performance in level 2 and 3 qualifications (GCSEs, A levels, IB, BTEC, Access to HE and their equivalents)
- your personal statement, reference and any additional statement supplied regarding special personal or extenuating circumstances which may impact on your studies
- your individual circumstances, e.g. your school, where you live or if you have been in care.

Contextual offers

Educational context can affect your grades, and we take this into account in order to recognise your potential. If you meet certain criteria, we may make you a lower offer than our typical entry requirements.

The circumstances we may take into account include:

- Applicants from state schools who live in an area with low participation rates in higher education (POLAR 4 LPN Q1/2)
- Applicants from state schools with more than 60% or at least 450 pupils who live in areas of deprivation (IMD Q1/Q2). View a list of eligible schools at exeter.ac.uk/undergraduate/entryrequirements/contextual
- Applicants we define as either a **Care Leaver**, or **Care Experienced**
- Applicants engaged on specific progression programmes run or managed by the University of Exeter

- Applicants seeking asylum, have limited leave to remain, are under 'humanitarian protection' or have refugee status.

Most of our programmes fit the contextual offer pattern below, but some courses – especially those with specific subject requirements – may differ. Make sure you check individual programme entry requirements online.

	CONTEXTUAL OFFER		
TYPICAL OFFER RANGE	A LEVEL	INTERNATIONAL BACCALAUREATE	BTEC
AAA (BMBS Medicine)	ABB	32	DDM
ABB or above	BBB	30	DDM
BBB	BBC	28	DMM

Interviews

The majority of our degrees do not require interviews. Where interviews are part of the process, we make this clear in the subject entries in this prospectus and on our website. Typically, we interview for Applied Psychology, Medical Imaging (Diagnostic Radiography), Medicine and Nursing degrees.

How we use your personal statement

Your academic results are the most important part of your application and are the best predictor for success at university. However, we consider personal statements for context, and you should include any mitigating or extenuating circumstances that may have affected your grades. Personal statements are a useful tool for understanding your motivation for applying, and every university considers them differently.

TOP TIPS

- 1 Know the key UCAS dates and deadlines; these vary depending on course and institution.
- 2 Know your school and college deadlines, and allow plenty of time for them to do your reference and final checks.
- 3 Apply by the Equal Consideration Date for your programme to maximise your chances of securing an offer.

Entry requirements

We welcome a wide range of qualifications, including A levels, the International Baccalaureate, BTEC Level 3 Diploma and Extended Diploma, Access to HE Diploma, Advanced Welsh Baccalaureate – Skills Challenge Certificate, and Scottish Highers and Advanced Highers.

Programme-specific requirements

All programmes have specific entry requirements. Where space permits, we show these in the subject entries in this prospectus. For full and current entry requirements, check our website.

You can find further information about our offer and decision online: exeter.ac.uk/undergraduate/applications/offer

International students

We recognise a wide range of international qualifications. You can find further information about academic and English language entry requirements: exeter.ac.uk/undergraduate/international/requirements

We require all applicants to demonstrate a good command of English before starting their degree. Generally we ask for at least 6.5 overall in IELTS, 90 in TOEFL, and 58 in Pearson Test of English, but please see our website for full details, as requirements do vary.

Mature students

We welcome applications from people aged over 21. As a mature student you may not be applying to university directly from school or college, and we are happy to help you as much as we can through the process.

You can find further information: exeter.ac.uk/maturestudents

Our offer

Our typical offers are for guidance before you apply. We express them in terms of A level grades and equivalent IB or BTEC requirements. If we make you an offer, we will tell you exactly what you need to achieve in your specific qualifications as part of that offer.

Our decision

We aim to make decisions on applications submitted on or before 15 January 2022 by the end of March 2022.

We will email you to inform you of our decision, so please make sure we have your current email address.

UCAS will officially confirm your offer and any specific conditions, and it will be shown on UCAS Track. It is very important that you carefully read the terms of your offer as communicated to you via UCAS.

Offer-Holder Visit Days

If we make you an offer and you do not need to attend an interview, we will invite you to attend an Offer-Holder Visit Day. These events are different to our other Open Days. They allow you to gain a greater insight into your chosen subject by meeting members of the department and your potential future classmates. Offer-Holder Visit Days usually take place between January and April.

Making your decision

When you have received offers from all the universities you have applied to, UCAS will let you know the deadline to make your decisions by. You can find more information on responding to your offers: ucas.com/ucas/undergraduate/apply-and-track/track-your-application

If you meet all the conditions of your offer, and have accepted us as your first-choice university, we will be able to confirm your place.

You can find more information about what happens at confirmation: exeter.ac.uk/undergraduate/applications/whatnext

QUALIFICATIONS AND GRADE EQUIVALENCIES >

We recognise a wide range of qualifications and equivalencies. Further information regarding some of the most popular qualifications is provided below. If the qualifications you are taking are not listed below (including international qualifications) please contact the Admissions Office.

QUALIFICATION	GRADE RANGE EQUIVALENCIES					SUBJECT EQUIVALENCIES			
	A levels*	A*AA	AAA	AAB	ABB	BBB	A*	A	B
Access to HE Diploma*	AAB or above: 30 L3 credits at Distinction Grade and 15 L3 credits at Merit Grade				ABB or below: 24 L3 credits at Distinction Grade and 21 L3 credits at Merit Grade		15 L3 credits at Distinction Grade in a relevant subject area	15 L3 credits at Distinction Grade in a relevant subject area	At least 12 L3 credits at Merit Grade in a relevant subject area

Welsh Bacalaureate	The Welsh Bacalaureate Advanced Diploma – Skills Challenge Certificate will be accepted as equivalent to an A level and can count towards our general entry requirements. Applicants would normally be expected to offer at least two A levels or equivalent in addition to this qualification (see A level requirements for specific grade and subject requirements). For applicants offering graded versions of this qualification from 2015, we will accept an A* grade as equivalent to an A* at A level, an A grade as equivalent to an A at A level, a B grade as equivalent to a B at A level, and a C grade as equivalent to a C at A level					A*	A	B	
Scottish Advanced Highers	AAA	AAB	ABB	BBB	BBC	n/a	A	B	
Scottish Highers	AAAAA	AAAAB	AAABB	AABBB	ABBBB	n/a	A	B	
Spanish Bachillerato	9.25 overall	9 overall	8.5 overall	8 overall	7.5 overall	10	9	8	
Swiss Federal Maturity Certificate / Maturitätszeugnis	5.3–4.8 or above	4.7–4.6 or above	4.5 or above	4.4 or above	4.3 or above	5.2	4.8	4.5	

* General Studies not accepted.

* Programme level entry requirements are
available on request or via the UCAS website.

▲ Programmes that require specific subjects
at A level will require applicants with BTEC

qualifications to offer the required subject
at A level unless otherwise stated on the
programme level entry in our prospectus.
Programme level entry requirements are
available via the UCAS website.

♦ Pre-U Principle Subjects and Global
Perspectives and Research are both accepted.

▼ From 2017 onwards.

I first visited the University at 14 for a residential and it sparked my ambition to get a place. I looked for a real campus and community feel as well as somewhere that would challenge me academically and provide the opportunities I need to reach my full potential.

I was nervous to move to a new place but as soon as I arrived, I met the people that I now consider to be my best friends. Settling in has been a challenge; understanding a new way of learning and adapting to a new level of workload is a big thing to get used to!

Molly

from Devon, studying Law
at our Streatham Campus.

Queen's Building, Streatham Campus

OUR SUBJECTS >

We offer courses covering practically the full spectrum of university subjects, from Art History to Physics, and Accounting to Zoology. Whatever you want to study, we will have a course that inspires you, taught by experts and delivered by one of our academic Colleges.

Our colleges are grouped strategically around common ground in research and teaching, bringing together related subjects to enable collaboration, flexibility and efficiency.

The Business School

Our Business School is proud to be among the 1 per cent of top global institutions to gain Triple Crown accreditation from the three most influential business school accreditation organisations: AACSB, EQUIS and AMBA. We offer highly-regarded courses in Accounting and Finance, Business and Management, and Economics.

The College of Medicine and Health

Our College of Medicine and Health is renowned internationally for its world-changing research into diabetes and dementia, and its close links with healthcare providers and correspondingly fast translation of that research into practice. It trains the finest doctors, nurses, radiographers and medical scientists via highly-rated undergraduate courses, primarily based at our St Luke's Campus.

Humanities and Social Sciences

We have a long-established reputation for our expertise in the humanities and social sciences. Our College of Humanities and College of Social Sciences and International Studies offer subjects ranging from Art History and Classics to Politics and Sociology, where exciting new research into the ways we live and express ourselves informs the teaching curriculum.

Science, Technology, Engineering and Mathematics

Our science base has grown significantly over the last two decades and we now boast some of the best facilities and courses in the UK. We offer degrees relevant to the climate crisis and sustainability, and in Biosciences, Sport Sciences, Geography and Earth Sciences, as well as Psychology, Physics and Astrophysics, Mathematics, Computer and Data Science.

Peter Chalk Centre, Streatham Campus

Entry requirements

The printed prospectus is prepared approximately two years in advance of your studies beginning. Entry requirements can change, so please check our website before you apply.

We express entry requirements as a range that we typically make offers within – see page 53 for more information.

Where a course needs you to have studied a specific subject, we try to provide this information in the course details on each subject page. Where requirements are complex you will need to check full details on our website.

Contextual offers

Fair access to higher education is hugely important – it enables social mobility and helps to improve opportunities for individuals and communities. When we review applications we take the context of how you've achieved your qualifications into consideration. If you meet certain criteria, we may make you a lower offer than our typical entry requirements. This is called a contextual offer.

For the vast majority of degrees our contextual offer is A level: BBB / IB: 30 / BTEC: DDM, but please make sure you see our individual programme pages online to clarify.

Find out more about contextual offers, including eligibility:
exeter.ac.uk/undergraduate/entryrequirements/contextual

Course options

Study and work abroad

Many of our degrees give you the option of studying or working abroad, usually for an additional full year. Where this is the case, the UCAS code for this option is listed in a separate column indicated by a  or a .

M-level programmes

Some of our courses are available as four-year versions with an integrated Masters. Where this is the case, a separate UCAS code for this option is listed.

Other course variants

Some of our degrees give you other options. Where this is the case, the UCAS code for these other options is listed in a separate column indicated by an appropriate icon.

All relevant icons for course options are explained in a key beneath the course details on every subject page.

Example modules

Where possible and relevant we include key module topics for each subject. These are indicative – modules are subject to change according to staff availability and student demand, and exact titles can vary. For full and up-to-date module details and descriptions please check our website.

Example careers

Where appropriate we include example careers that our degrees might lead to. This information is adapted from data from the Destination of Leavers of Higher Education survey, which each year surveys new graduates about what they're doing six months after finishing university.

Find out more: exeter.ac.uk/undergraduate 

ACCOUNTING AND FINANCE

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/accounting 

Accounting students studying in the Business School, Streatham Campus

8th

8th for Accounting and Finance in *The Times* and *The Sunday Times Good University Guide 2021*.

Specific modules can enable exemptions from professional accountancy exams.

Taught at our business school, among the 1% of the very best global institutions to gain Triple Crown accreditation.¹

Combine your degree with a salaried industrial placement at companies such as EY, PwC and Lloyds Banking Group or spend a year studying abroad.

- Researcher
- Tax Associate
- Trainee Stockbroker

Why not consider?... Business and Management on page 72 | Economics on page 86 | Mathematics on page 106

¹ AACSB, EQUIS and AMBA.

Accounting and finance is a key function in all organisations, informing decision-making and indicating performance. With the growth of accounting technologies and the digitisation of processes, accounting and finance is evolving rapidly, posing exciting challenges and opportunities.

Our degrees offer you many ways to specialise, including tax, auditing and management accounting. You will combine these skills with wider business knowledge from management to organisational law, marketing to economics, creating varied and exciting career possibilities. The skills you gain from our Accounting and Finance degrees are recognised internationally and are extremely flexible for a range of industries and roles.

I chose Exeter because the ranking of the Accounting and Finance course is among the top in the UK. The employment rate after university is also very high. Moreover, Exeter is a lovely city and has a very student-friendly campus.

Khin, from Myanmar, studying Accounting and Finance.

I chose Exeter because the resources available to Business School students are unmatched by any other universities I looked at. The student support services at Exeter are incredible, and there are top class facilities for learning as well as a peaceful atmosphere for relaxing.

Richard, from the UK, studying Accounting and Finance.

- Recruitment Consultant
- Further postgraduate study

Why not consider?... Archaeology on page 66 | Flexible Combined Honours on page 94 | Human Sciences on page 70 | Sociology on page 132

Anthropology is the study of humans, human behaviour and societies, and is one of the most exciting, relevant and varied subjects you can study at university.

At Exeter we have a contemporary approach grounded in numerous social settings and institutions, including NGOs, hospitals, Welsh farming communities, African wildlife centres, Hindu Ashrams, English multicultural neighbourhoods and warzones in the Middle East. You'll benefit from access to the latest thinking and resources as your teachers contribute research to current debates.

Based in the Department of Sociology, Philosophy and Anthropology, our unique environment encourages a productive fusion of the three subjects. This creates cross-over research domains such as the field of music, aesthetics and cognition, which researchers with diverse disciplinary training pursue together.

Choosing to study in Denmark allowed me to experience an international environment and study anthropology in a new context. My year abroad helped me to grow both academically and personally, as well as giving me the confidence to apply my degree to various contexts for future career prospects.

Clare, from the UK, studying Anthropology with Study Abroad.

Why not consider?... Anthropology on page 62 | Flexible Combined Honours on page 94 | History on page 100 | Modern Languages and Cultures on page 114 | Politics and International Relations on page 126

Our Institute of Arab and Islamic Studies is one of Europe’s most renowned centres for research and teaching in the Arab and Muslim world. Facilities include a computerised language lab, lecture theatres, seminar rooms, satellite TV for viewing Middle Eastern channels and an exhibition space.

Arabic is one of the world’s major languages, part of the bedrock of Islam, and key to understanding the rich culture and history of the Middle East. We offer courses in Arabic and Middle East languages as well as comprehensive study of the literatures and cultures of the wider region. This includes the history, politics, economies, societies and anthropology of the region, and almost every aspect of Islamic studies – from medieval to modern Islam.

The level of individual support and attention we get is incredible. I know that all my teachers truly know how I learn and how best to support me, and if I need any more support I know that I can always go to them for help. The Institute is a beautiful building and truly feels like home at university, we’re given a safe space to explore ourselves and academia and, for me, it’s an ideal place to learn.

Sumiah, from the US, studying Master of Arabic and Islamic Studies.

I chose Exeter because of the combination of inspiring lecturers, interesting modules, exciting year abroad prospects and it being an utterly beautiful place to study. I love the diversity of my degree and thus inevitably the people I have met and continue to meet along the way. There is so much flexibility in terms of how you can tailor your degree to what you want to get out of it, for me it’s become a living, breathing part of my life!

Daisy, from the UK, studying Arab and Islamic Studies with Spanish.

Explore the origins and evolution of humankind and the foundations of our modern world through Archaeology at Exeter. Our degrees combine fascinating academic study with practical, hands-on experience delivering a multitude of transferable skills. Our courses bridge the arts-science divide through a diverse range of topics, from human evolution to the creation of today's landscapes.

Exeter is surrounded by some of the country's richest archaeological sites. During your studies you will have the opportunity to be involved in fieldwork at some of the most fascinating ancient locations around the world.

One of my highlights was going to Mitchell in South Dakota as part of my course; we worked on a tribal site excavation there. The University was really helpful offering financial support to do this.
Jax, from Ceredigion, studying Archaeology.

The lecturers are motivational and use a variety of teaching methods. The University also allows access to a wide range of academic endeavours provided you can apply yourself: I have been able to study Japanese as part of my degree. The atmosphere allows for easy motivation resulting in an enjoyable learning experience and campus life.
Tumi, from Zimbabwe, studying Archaeology with Forensic Science.

Why not consider?... Classics and Ancient History on page 74 | Film & Television Studies on page 92 | Flexible Combined Honours on page 94 | History on page 100 | Liberal Arts on page 104

Throughout history, humanity has documented itself with images. By studying Art History & Visual Culture at Exeter you'll explore the emergence of art and the wider visual environments humanity has produced to reflect itself.

While our programmes encompass all periods of classical art, they also extend outwards and into the present day to focus on a diverse array of visual imagery and objects, drawing upon our research specialisms in areas such as visual representations of ethnicity, gender and sexuality.

Your study will be enhanced with an intensive one-week field trip to one of Europe's renowned cultural centres. You will also have access to our Bill Douglas Cinema Museum and the Digital Humanities Lab, and there are opportunities to boost your employability with curation skills at local galleries and museums.

I wanted to study a course which allowed me to understand the routes to culture and art. Writing essays and delivering presentations gives me the opportunity to develop a critical understanding and awareness of the best ways to present my work. The teaching is very hands on, and I always feel that I can talk to my personal tutor when I have any queries.

Carrie, from Hong Kong, studying Art History & Visual Culture and Drama.

BUSINESS AND MANAGEMENT

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/business 

Entrepreneurship, sustainability and global connectivity are embedded throughout our courses

6th

6th for Business and Management Studies in *The Complete University Guide 2021*.

Previous salaried industrial placements include: GlaxoSmithKline, Deloitte and Apple.

Taught at our business school, among the 1% of the very best global institutions to gain Triple Crown accreditation.¹

Study abroad at one of our partner universities in Europe, USA, Canada, South America, Asia, Australia or New Zealand.

EXAMPLE MODULES:

- Brands and Branding
- Business and Climate Change
- Digital Technologies and the Future of Work
- Economics for Management
- Impactful Entrepreneurship
- Innovation for Urgent Global Challenges
- Leading in International Contexts
- Marketing in a Digital Age
- Sustainable Enterprise Economy
- Thinking Entrepreneurially

EXAMPLE CAREERS:

- Brand Manager
- Business Development Consultant
- Credit Analyst
- General Management Trainee
- Investment Banking Analyst
- Market Researcher
- Operations Management Trainee
- Overseas Purchasing Manager
- Project Manager
- Recruitment Consultant

¹ AACSB, EQUIS and AMBA.

Traditional business models are being disrupted by emerging technologies, the climate crisis, the gig economy and shifting socio-political dynamics, creating exciting challenges and opportunities.

Studying Business with us means gaining the skills to stay ahead of this rapidly changing environment and lead the next generation. Our flexible degrees allow you to pursue specialist knowledge or graduate with a powerful transferable skill set – putting you in control of your future.

On our Streatham Campus you can choose to specialise in Management, Marketing or Business Analytics, giving you the data skills critical to the future of business; or study on our brand new four-year degree International Business and Modern Languages.

On our Penryn Campus you'll develop sustainable, future-focused business acumen, helping you stand out in today's international job market. Our programmes address the challenges of business growth in an interconnected, climate-changing world.

Studying at the University of Exeter was one of the best decisions I have ever made. The BSc Business course was diverse, exciting and engaging, and the university experience was unbeatable. My personal highlights of the course include the real-world opportunities to apply learning and the passionate lecturers. Olly, from the UK, studying Business at our Penryn Campus.

Why not consider?... Archaeology on page 66 | Art History & Visual Culture on page 68 | Flexible Combined Honours on page 94 | History on page 100 | Liberal Arts on page 104 | Modern Languages and Cultures on page 114

Studying Classics and Ancient History at Exeter gives you the opportunity to explore the historic background that underpins our understanding of the world. You will learn how societies and cultures have been critically influenced by the ideas and thoughts of our ancestors.

Immersing yourself in the culture, languages, literature, history, art and philosophy of the ancient Mediterranean world is immensely rewarding, and provides tools unexpectedly appropriate to modern life, such as communication, critical understanding, and analytical approaches to evidence, culture and society. Our courses enable you to study one or more of the ancient languages, with or without experience, or to focus on cultures and translated literatures.

I've loved every moment of my time here; the course has so many different options that it can really cater to everyone's interests. It also gives people the opportunity to explore areas that they've not had the chance to explore before and to develop new interests. It's been really fun going from a lecture on philosophy to one on drama to learning Latin, all in one day.

There's been a lot of stuff that I didn't expect, but that all adds to the excitement of it and has meant that I never know what's coming next. It's certainly never stale!

Seth, from Suffolk, studying Classical Studies with Study Abroad.

The study of communications shows us how individuals, organisations and cultures around the world interact with each other. It enables us to understand how and why ideas and content are generated, disseminated and received, including through successive waves of technological innovation.

Our courses will hone your practical and professional skills, equipping you to work across the creative industries or anywhere requiring people who understand how communications work. You will study a range of contexts and applications, including international, social and historical communications, gaining a thorough grounding in the field.

We will give you the opportunity to experience different ways of learning, with specialist modules that cover everything from the history of communications and professional writing, to language and social interaction and global communications.

This exciting programme of study combines the highest standards of academic rigour with innovative, practice-based learning in the broad area of global communications. Our course is wide ranging, flexible and gives students the chance to develop their own specialist areas of interest.

Professor Jo Gill, College of Humanities.

¹ Graduate Outcomes courses in Computer Science data from 2017–18 graduates, surveyed 15 months after graduating.

From the digital revolution to the social media boom, computer science has transformed the way we communicate and has applications reaching across society to help shape a better world.

We recognise that computer science is more than programming. You'll become skilled in the specification, design and implementation of computer systems, as well as gaining an understanding of the theory behind them.

Our nurturing department will support you throughout your degree, helping you to undertake valuable work experience and guiding you on your journey to fulfil your career ambitions.

Computer science is unpredictable and exciting and it's never going to leave me bored. I'm doing things I never thought possible for a first-year undergraduate, including working for a university start-up company in software development, gaining a huge amount of experience on real life projects.

Marija, from Serbia, studying Computer Science.

I've always had an interest in computers and thoroughly enjoy problem solving. Thanks to the flexibility of my course I've been able to tailor my degree to what I enjoy and my career goals. I'm now working in the technical team for Sainsbury's.

Scott, from Wales, Computer Science graduate.

Why not consider?... Anthropology on page 62 | Sociology on page 132

¹ Research Excellent Framework 2014 based on the percentage of research categorised as 4* and 3*.

Criminologists play a vital role in the criminal justice system. They work to understand the social and psychological factors that cause people to commit crimes and research the most effective approaches to rehabilitation.

Offered under the prestigious Q-Step programme for quantitative social science training, our BSc in Criminology provides excellent training in applied research and data analysis skills which will help you investigate the nature of crime. You will analyse crime survey data or the types of information used to inform intelligence-led policing and offender profiling. If you choose to study BSc Criminology with us you will benefit from being part of the Exeter Q-Step Centre, training you in data management, analysis and interpretation.

A step-change in quantitative social science skills

Funded by the Nuffield Foundation, ESRC and HEFCE

One of the highlights of my course is the emphasis on quantitative analysis. To the uninitiated, that can sound extremely daunting, but I am so incredibly grateful for the numerous doors such a skill will open for me. For anybody interested in the field, Exeter's Criminology course is ideal. The large variety of available modules makes it possible for students to tailor their experience however they wish, with classes ranging from Forensic Science (based in the Biology department) to Terrorism. Studying Criminology here will prepare you for so many careers down the line, especially those specific to criminal justice and law enforcement.

Simone, from the US, studying Criminology.

Why not consider?... Computer Science and IT on page 78 | Mathematics on page 106

Data is the defining topic of our era and holds the key to understanding complex challenges of enormous scale.

Our degrees have been developed in collaboration with industry and focus on both the technical skills and mindset of a data scientist. We'll teach you how to pose questions and explore connections as well as giving you the skills to handle and manipulate big data.

Our academics teach using current industry methods, platforms, software and datasets to ensure you are fully prepared for the workplace upon graduation. You'll learn skills that are highly transferable and apply to a diverse range of sectors, offering huge potential for a varied and exciting career.

I chose Data Science because I didn't want to just focus on coding. Exeter is one of the only universities with a course that lets me combine my interests and passion in all areas, such as statistics and machine learning. Already during my first two months I've touched upon mathematics and the basics of programming. It's really exciting and will open doors to a huge range of careers.

Natalie, from Hong Kong, studying Mathematics and Data Science.

I always describe Data Science as Computer Science plus Maths, divided by two! I chose Exeter because very few universities offer Data Science. Exeter is also highly ranked, so it was an easy decision. I've found the course really friendly; the lecturers are really nice and are so willing to give you extra support.

Thyba, from Vietnam, studying Data Science.

Why not consider?... Art History & Visual Culture on page 68 | English on page 90 | Flexible Combined Honours on page 94 | Liberal Arts on page 104

¹ Graduate Outcomes survey data from students graduating during 2017–18.

At Exeter you will discover how far-reaching drama is, uncovering its role in world history, politics, art, culture, technology, philosophy and society.

You'll become a thoughtful, politically informed, daring and self-reflective scholar-practitioner by creating your own performance work and analysing the work of others. You'll also gain key transferable skills such as collaboration, communication, research, information synthesis, and creative and critical thinking. Most importantly, you will develop as a person, exploring who you are and who you might become, and find out what you want to do in the world.

Exeter has been a big step up compared to post-16 and secondary institutions I attended. It's quite surreal to work with seasoned industry professionals who've published books and worked with famous names, and who have mastered their craft across the world.

Taylor, from Worcestershire, studying Drama with Year Abroad.

I love everything about studying Drama, from the modules that we get to pick, to the lectures we get to sit in on. The lecturers inspire you to think critically and embrace new perspectives. I am very fortunate to be in a department that cares so wholeheartedly about its students.

Nubuke, from Ghana, studying Drama.

¹ AACSB, EQUIS and AMBA. ² Partner institutions for the year abroad are in 26 countries all over the globe, including Australia, Japan, and Sweden.

There has never been a more exciting time to study Economics as global populations increase, international politics fluctuate and the climate crisis disrupts existing economic models.

Studying at our triple accredited business school, you will develop a comprehensive understanding of essential topics such as inflation, monopoly control and the growth of developing economies. You will have the opportunity to specialise in the interrelationships between economics and business, politics, finance or the application of econometrics. Choose from a range of optional modules to further specialise your degree, or add a year abroad or in industry to gain a unique graduate profile.

My favourite module so far is Psychological Aspects of Consumption. The lecturer is experienced in this field and shared a lot of research and experiments he has done, as well as relevant experiments that looked at consumer psychology with different age groups. It triggered my interest in the application of the theories and developed my analytical and critical thinking.

Ruby, from China, studying Economics and Finance with Industrial Experience.

¹ Graduate Outcomes survey 2017–18.

Engineering at Exeter combines science, creativity and critical thinking to drive innovation and change in response to some of society's biggest challenges.

We teach the full breadth of Engineering with classic options in mechanical, civil and electronic, as well as entrepreneurship and management pathways that link engineering with business. A core first year gives you the reassurance and flexibility to make the right choice in your specialism.

We prioritise a hands-on approach to learning with a focus upon practical project work. We'll support you in developing a creative, confident and logical approach to problem solving, making you a highly valued graduate and opening doors to a wide range of exciting careers.

I thought engineering was designing cars or mending boilers, but during the London Paralympics I became fascinated with prosthesis and how engineers are designing devices that directly change human life and health. I chose Exeter as tackling societal problems is something they are really passionate about.

English is an ever-evolving discipline and Exeter, as a UNESCO City of Literature, has a fantastic pool of assets, writers, projects and organisations to enrich your study experience. You will explore literature, film and creative writing on one of the most flexible and varied programmes in the country, learning from world-renowned academics covering an immense area of research specialisms. We will equip you with strong research, analytical and problem solving skills, making you highly sought after by employers. We have one of the largest English departments in the country and offer a wider variety of modules than almost anywhere else.

My studies have been incredible and I cannot speak highly enough of my English course. Exeter's internship programme has allowed me to work in the Digital Humanities Labs assisting academics on world-leading research.

Students using the resources in The Bill Douglas Cinema Museum, Streatham Campus

TOP 5

Top 5 in the *Guardian University Guide 2021* and *The Complete University Guide 2021*.

Access to internationally acclaimed actors, directors and film critics via events such as our 'Creative Dialogues' lecture series.

**The Bill Douglas
CINEMA
MUSEUM**

World class film research resources, including The Bill Douglas Cinema Museum – the largest university library collection in the UK.

Distinctive international approach to film analysis, history and theory.

EXAMPLE MODULES:

- Cinescapes: Time, Space and Identity
- Female Screens: Representation, Agency and Authorship
- India Uncovered: Representations in Film and Fiction
- Queering British Film and Television
- Something to See: War and Visual Media
- Surrealism and its Legacies
- Television: Times, Trends and Technologies
- The Contemporary Film and Television Industries

EXAMPLE CAREERS:

- Accounts Executive
- Data and Research Analyst
- Digital Media Assistant
- Editor/Film-maker
- Innovations Coordinator
- Marketing Executive
- Market Researcher
- Post-production Assistant
- Production Runner
- PR Consultant

Why not consider?... Art History & Visual Culture on page 68 | English on page 90 | Flexible Combined Honours on page 94 | Liberal Arts on page 104 | Modern Languages and Cultures on page 114

The moving image has become the dominant communication medium over the last century. Its creative expression, in widely different cultural contexts, explores and articulates ideas and narratives across the globe.

Studying at Exeter will enable you to develop historical, analytical and textual skills, as well as a knowledge of the parameters of world cinema and television, past and present.

You will benefit from our Creative Dialogues lecture series, which invites internationally acclaimed film directors and critics to offer insights into current practice and debates, and access the resources of the world-renowned Bill Douglas Cinema Museum. You'll also develop highly desirable transferable skills that will leave you well positioned for a variety of employment options.

Film & Television Studies is a comparatively small programme, so you create strong relationships with your lecturers and peers as you engage in more concentrated time together. You get to know the lecturers on a more personal level, meaning they can give you more tailored advice when it comes to assessments and potential careers. Amber, from Surrey, studying Film & Television Studies.

Our unique Flexible Combined Honours programme lets you build your own degree. You can combine any two or three subjects from the list below, depending on your interests and ambitions, and you having the necessary grades. You can choose diverse subjects – such as History with Mathematics, or Economics and Geography. You can add a language, study abroad or explore work placement options. These unique combinations will help you to stand out from the crowd in a competitive job market.

As I was looking at universities I came across the term 'Flexible Combined Honours degree' and was looking for a course where I could study Management and Art History at the same time. A chance for me to be passionate about more than one subject without limitations.

I am hoping to secure a job in an auction house, where understanding the financial market is just as important as having a deep knowledge of art.

Dorina, from Hungary, studying Management and Art History at our Streatham Campus.

SUBJECTS AND PATHWAYS OFFERED AT OUR PENRYN CAMPUS:

Business • Chinese (Mandarin) (minor) • Environmental Law • French (minor) • History • International Relations • Law • Politics • Spanish (minor)

¹ Graduate Outcomes data from 2017–18 graduates, surveyed 15 months after graduating.

By studying Geography and Environmental Science you'll consider the critical global issues and challenges affecting people and environments around the world.

At our Penryn Campus we break down the barriers between traditional academic disciplines and examine the links between society and the natural environment.

At our Streatham Campus you can explore anything from tropical coastal environments to landscape systems management, and sustainability and development to the global flows of people, ideas and goods.

My favourite part of the programme has been the module about climate change, as it delivers lots of information about how human activities have impacted global warming and the potential solutions. Marky, from Hong Kong, studying Geography at our Penryn Campus.

- Mine Geologist
- Mining Engineer
- Palaeontological Preparator
- Technical Director
- Tunnel Engineer

Why not consider?... Renewable Energy on page 130 | Geography and Environmental Science on page 96

Geology is the study of our planet and how it has evolved over the past 4.5 billion years, from the resources from which it's made, to the organisms that existed before our time. You'll learn to understand the Earth's history through a mixture of pure and applied Earth science, placing you in a position to tackle some of the world's most important environmental challenges.

Taking advantage of our spectacular location on the Penryn Campus in Cornwall, you'll benefit from unique opportunities to integrate classroom learning with extensive field based training in the UK and overseas. Your degree will provide you with the ideal mix of skills and experience for employment in many geology-facing sectors.

The greatest thing about the Geology course for me is the field trips. You get to know your course mates really well and make close friends while putting your studies into context. The Skye field class is definitely a fond memory – such a challenge but so rewarding!

Ben, from Hampshire, studying BSc Geology at our Penryn Campus.

¹ DLHE 2016–17.

Only by examining and understanding the past can we comprehend the contemporary challenges we face. At Exeter you'll build a programme based on your interests and ambitions, exploring the changes in societies, conflict, culture, religion, politics and science that define us and shape our present experience. Through teaching by world-renowned academics, you will develop critical thinking skills and the ability to construct powerful and persuasive arguments, grounded in evidence. At Streatham you will study vital topics such as gender, race and global imperialism, and traverse 1,500 years from the fall of the Roman Empire through to the post-Communist era. At Penryn you will be among a close-knit, global community studying concepts in history from 1600 to the present, with an emphasis on public history and optional modules covering British, European and world history.

History has always been my favourite subject. The wide range of module choices has allowed me to study a range of very interesting time periods and topics, and I have been given the opportunity to learn a new language which I am thoroughly enjoying.

Hanife, from East London, studying History at our Streatham Campus.

Why not consider?... Business and Management on page 72 | Criminology on page 80 | Flexible Combined Honours on page 94 | Sociology on page 132

By studying the rules that bind a society together you will sharpen your mind and strengthen your understanding of the world. Our degrees deliver a rigorous understanding of legal principles, as well as an examination of law in different theoretical and social contexts, with a constant eye on regional and global developments. You will study in applied settings – community legal projects, advocacy, pro bono work, small learning communities, mooting, or via a four-year work placement programme. Our degrees give you the skills to pursue a career as a lawyer and equip you with a firm foundation for other careers. Our programmes in Cornwall allow you to combine Law with Business.

The University of Exeter has been the right choice for me, undoubtedly. Its healthy mix of focused study and welcoming social environments, as well as the support the staff are willing to provide, makes the process of going, surviving and thriving at university not only achievable, but relatively easy to accomplish. Going to university could very easily turn into a daunting process without the right kind of support and environment, and I have been fortunate enough to find comfort in both here.

Hamizah, from Malaysia, studying Law at our Streatham Campus.

LIBERAL ARTS

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/libarts 

Benefit from collaborating with students studying a broad range of majors

Choose from a wide range of subjects across the University to major in.

Flexible, interdisciplinary approach to learning.

Global model, developing skills valued by international employers.

Work with external organisations to tackle a real-world issue through the core Think Tank module.

EXAMPLE MODULES:

Year 1 compulsory

- Being Human in the Modern World
- An ancient or modern language
- Modules in a specialism

Year 2 compulsory

- Think Tank
- Chosen major

Year 3 compulsory

- Dissertation
- Major specialism

EXAMPLE CAREERS:

- Campaigns Executive
- Charity Worker
- Fashion Events Producer
- Graduate Researcher
- Incident Manager
- Marketing and Communications Assistant
- Policy Advisor
- Recruitment and Admissions Coordinator
- Research Associate
- Student Experience Officer

Why not consider?... Flexible Combined Honours on page 94

Our Liberal Arts programme is an internationally recognised interdisciplinary approach to study which is outside of traditional subject boundaries. It brings together the humanities, social sciences, business and other associated subjects, and will equip you with the knowledge and skills to address the many complex challenges of today’s global environment.

You will tackle real world issues, and hone critical thinking and problem solving skills by selecting a field of specialisation (your major), and complementing it with a broad range of other subjects alongside an ancient or modern language.

As a Liberal Arts student I am living the best of both worlds. I have access to most subjects from the Humanities college, the Business School as well as some social sciences. This wide range allows me to build a degree tailored specifically to my interests.
Augusta, from Switzerland, studying Liberal Arts (History).

I have been able to do lots of different modules before I zoned in on a major. The diversity of my Liberal Arts degree means that I have met a lot of students and I’ve had various lecturers in the departments of English, Sociology, Criminology, French and many more! Evidently the teaching at Exeter is phenomenal, because I have decided to do a postgraduate Masters after my degree.
Cameryn, from Zimbabwe, studying Liberal Arts (Sociology).

MAJOR SUBJECTS OFFERED

Anthropology • Arabic and Islamic Studies/Middle Eastern Studies • Archaeology • Art History & Visual Culture • Classics and Ancient History • Communications • Creative Writing • Criminology • Digital Humanities • Drama • Economics • English • Film & Television Studies • Geography • History • International Relations • Marketing and Management • Modern Languages • Philosophy • Politics • Sociology • Theology and Religion

Why not consider?... Flexible Combined Honours on page 94 | Natural Sciences on page 116 | Physics and Astronomy on page 124

Studying Mathematics is an inspiring and rewarding experience that helps us to interpret and solve global problems that would otherwise be incomprehensible. It can open up multiple pathways for your future. As well as core mathematics – statistics, pure mathematics and computing – we excel in the application of mathematics to real-world problems, including climate modelling, natural systems, health and medicine. Our department is inclusive and supportive, and our community of academics, students and staff are always available and delighted to help ensure you get the most out of your degree.

My proudest achievement so far is being involved in a piece of published academic literature; I never thought it would be possible to get this experience whilst being an undergrad. I've also had the opportunity to conduct my own piece of near-publishable research which has really helped prepare me for a future in academia.

Marcus, from Essex, studying Mathematics.

MEDICAL IMAGING

(Diagnostic Radiography)

For full programme, module and entry requirement information visit:
exeter.ac.uk/ug/medical-imaging 

Magnetic Resonance Imaging (MRI) teaching suite, St Luke's Campus

Top 5 in all major UK league tables.

4-month placement blocks each year – become part of the team.

100%

100% graduate employment or further study.

Approved by the Health and Care Professions Council and the Royal College of Radiographers.

RADIOGRAPHERS

Radiographers trained in the UK are recognised as being among the best in the world and the health providers of many countries recruit in the UK. On graduation you will be eligible to apply for registration as a Diagnostic Radiographer with the Health and Care Professions Council (HCPC) and for membership of the Society and College of Radiographers.

CLINICAL PLACEMENTS

The clinical placements are within Radiology Departments in one of our 10 placement hospitals: Barnstaple // Bournemouth // Dorchester // Exeter // Plymouth // Poole // Taunton // Torbay // Truro // Yeovil.

You will spend time at a different placement site each year in order to ensure you get a wide range of clinical experience whilst exploring all that the South West has to offer.

Why not consider?... Nursing on page 120 | Medical Sciences on page 110

With a degree in Medical Imaging (Diagnostic Radiography) you'll have the skills required to embark on a career as a Diagnostic Radiographer, working in a range of hospital departments and using various imaging technologies to look inside the human body and help diagnosis.

Patients are at the centre of all we do, and practical clinical placements are integral to our course. These placements consist of one large block per year, giving you the chance to settle into one of our partner hospitals and allowing you to gain confidence in your abilities.

We have fantastic equipment on site, from purpose-built laboratories to a digital radiography room and ultrasound. Our brand new 3T MRI scanner and PET / CT scanner will open up new opportunities for your learning.

Our Medical Imaging team are one of the few in the country to actively research, with many teaching staff undertaking or having completed PhDs. Not only is our teaching led by the latest research in the area but you will have the opportunity to be a part of the research.

Once I've qualified from the University of Exeter, I'd like to specialise and then travel; this course gives me the opportunity to work not only in the UK, but anywhere in the world.

Natalie, from Dorset, studying Medical Imaging (Diagnostic Radiography).

FURTHER ENTRY REQUIREMENTS

Interviews

All shortlisted applicants will be invited for interview in January, February or March.

Health assessments

All offer holders will be required to complete a health questionnaire, to be screened by the Occupational Health Department. You may be required to attend a medical examination as part of the admissions process.

Criminal convictions

All offers are conditional upon a Criminal Conviction Self Declaration and an enhanced disclosure check via the Disclosure & Barring Service (formerly the Criminal Records Bureau).

MEDICAL SCIENCES

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/medicalsci 

Fluorescence microscope in the Medical Science teaching laboratory, St Luke's Campus

Professional training year in the UK or abroad – open to all students.

Small group learning – independent learning, teamwork, collaboration and communication.

Research-inspired teaching – part of our research community from day one.

Beyond biomedical sciences – includes populations, clinical trials, public health, health economics and more.

EXAMPLE MODULES:

- Disease, Diagnostics and Therapeutics
- Ethical Issues in Health Research
- Microbiology
- Immunopathology
- Integrated Human Physiology
- Introduction to Pharmacology
- Managing Clinical Trials: Putting Science into Practice
- Medical Genomics
- Pharmacogenomics
- Rational Drug Design

EXAMPLE CAREERS:

- Graduate entry to Medicine, Dentistry or other accredited healthcare programme
- Health Professionals
- NHS Management
- Pharmaceuticals or medical technology. Roles might include:
 - Clinical trials
 - Research and development
 - Sales and marketing
- Training for the NHS Scientist Training Programme (STP)
- Science, Engineering and Production

Why not consider?... Biosciences on page 70 | Medicine on page 112 | Neuroscience on page 118 | Sport and Health Sciences on page 134

Learn about the science that underpins medicine. Discover how the human body works, how things can go wrong due to disease and trauma, and how normal function can be restored. Our degrees prepare you to translate scientific discoveries and technological advances into improved healthcare through small group sessions, lectures and laboratory practicals. Specialise in the area that interests you most, and undertake a research project with our world-renowned research groups, tailoring your degree to match your career ambitions.

Our Sport and Exercise Medical Sciences degree, taught jointly by the Medical School and Sport and Health Sciences blends an understanding of the pathology, prevention and treatment of acute or chronic disease/injury, alongside an insight into the science underpinning the optimal preparation, performance and rehabilitation of the athlete or healing patient.

The exposure to world-class research at the Medical School has motivated me to work hard and has assured me that if you put effort into achieving your dreams, you'll eventually do it and you'll be great!
 Stanimir, from Bulgaria, studying Medical Sciences.

I love the fact that there's a sport science and medical sciences side; I have a big passion for biology but also love sports and science, so it's the perfect combination.
 Bella, from South Africa, studying Sport and Exercise Medical Sciences.

MEDICINE

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/medicine 

Simulation suite at the Clinical Skills Resource Centre at Heavitree Hospital, Exeter

TOP 15

Top 15 in the UK for Medicine in *The Times* and *The Sunday Times Good University Guide 2021*.

Opportunity for international placements.

General Medical Council

GMC accredited.

Clinical experience within the first month.

TRURO (CORNWALL) SITE

Located at the Royal Cornwall Hospital, you will be on rotation here at some point during the programme. You will be taught in the Knowledge Spa, which is a modern, multi-disciplinary building that is also the home of the Medical School's European Centre for Environment and Human Health and has its own specialist teaching facilities.

INTERCALATION

Intercalation gives you the chance to take a one-year interlude in your programme to broaden your horizons by studying a subject at either Bachelors or Masters level.

Choose from subjects such as Medical Sciences, Genomic Medicine, Clinical Education, Healthcare Leadership and Management, or Environment and Human Health.

Why not consider?... Biosciences on page 70 | Medical Sciences on page 110 | Neuroscience on page 118 | Nursing on page 120

Become a doctor with the skills needed to address the global challenges facing health and social care. Our medical degree gives you clinical experience within the first month of starting your studies, and your placements will introduce you to a range of students in locations such as hospitals, General Practice and community practices.

Our use of small groups for teaching provides an intensively supported learning environment where you'll be taught to challenge, stretch and empower yourself. This approach means you'll be prepared for working in a multi-professional clinical team in the NHS.

The highlights for me have been the fantastic placements which I have been able to experience from the first week at Exeter. It has allowed me to grow and develop into a future doctor, not just a medical student.

Kayleigh, from Essex, studying Medicine.

COURSE	UCAS CODES	TYPICAL OFFER
	ST LUKE'S CAMPUS, EXETER	5/6 years depending on intercalation
BMBS Medicine	A100	AAA / 36 / DDD <i>AL grade A or IB HL6 in Biology and Chemistry</i>

FURTHER ENTRY REQUIREMENTS

The deadline for applications is 15 October 2021.

University Clinical Aptitude Test (UCAT)

Candidates applying with predicted or achieved A levels will be required to sit the UCAT.

Graduate Medical School Admissions Test (GAMSAT)

Candidates applying with an existing degree, or if it will be more than two full academic years (September to August) since you completed your A levels or equivalent qualifications, will be required to sit the GAMSAT.

Interviews

All shortlisted applicants will be invited for interview between December and March.

Health assessments

All offer holders will be required to complete a health questionnaire, to be screened by the Occupational Health Department. You may be required to attend a medical examination as part of the admissions process. In addition, all medical students will be required to have tests to determine their Hepatitis B surface antigen, TB and HIV status. You should also have an up-to-date immunisation history.

Criminal convictions

All offers are conditional upon a Criminal Conviction Self Declaration and an enhanced disclosure check via the Disclosure & Barring Service (formerly the Criminal Records Bureau).

MODERN LANGUAGES AND CULTURES

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/languages 

The Spectacular Translation Machine is an all-day live translation event in which graphic novels are brought to life in English during the University's Translation! Festival

Study 1–3 languages with seven language options.

TOP 200

Top 200 in *The QS World University Subject Rankings 2020*.

Year abroad spent studying at a partner university or in employment.

EXAMPLE MODULES:

- Modern China
- Dialectology in France
- Freedom and French Realism
- Berlin – Culture, History and Politics
- Youth and Age: Generations in German Fiction and Film
- Italian Film Through Stardom
- Afro-Brazil
- Russia: Empire and Identity
- Civil War and Francoism
- Almodóvar's Spain: Cinema and Society

EXAMPLE CAREERS:

- Business Development Manager
- Content and Strategy Executive
- Creative Director Assistant
- Investment Analyst
- Language and Culture Assistant
- Project Manager
- PR Manager
- Teaching Assistant
- Teacher of English as a foreign language
- Travel Adviser

Did you know about the resources in our Foreign Language Centre?...
(see page 31)

Language is fundamental to all societies and plays a central role in shaping how individuals and communities, businesses and institutions work together.

Studying with us will help you develop advanced linguistic competence, cultural knowledge and valuable critical skills. You will learn to evaluate information, present convincing arguments and communicate effectively in a wide range of environments – all skills that are highly valued by employers in a changing world.

Integrated employment or study abroad will refine your linguistic capability and intercultural awareness, and you can create your own bespoke pathway of modules, engaging with linguistics, history, politics, literature, philosophy, visual culture and film.

The Modern Languages course at Exeter offers a variety of options, ranging from Literature to Film Studies to Linguistics and many more in between. For me, this academic diversity was incredibly important and I have really appreciated the freedom that this has given me to create a course structure that was personal to me.

Rachel, from Hertfordshire, studying Modern Languages (French and Italian).

LANGUAGES OFFERED:

- Software Engineer
- Trainee Operational Meteorologist

Why not consider?... Biosciences on page 70 | Mathematics on page 106 | Physics and Astronomy on page 124

¹ Graduate Outcomes survey data from students graduating during 2017–18.

Our Natural Sciences degrees are specially designed to let you work across all the sciences – without pathways or constraints.

We combine our expertise in biology, physics, chemistry, mathematics and computer science to deliver a learning experience that draws directly upon our research. You can even explore exciting topics including mathematical and computational biology; materials science and materials chemistry; the science of oceans, atmospheres and climate; astrophysics; and energy research.

Our department is nurturing and supportive and we'll encourage you to follow your interests and develop your own ideas as an independent scientist and researcher.

I loved all sciences and couldn't decide which to choose before university. Natural Sciences allows me to do my favourite aspects of them all, it's so versatile. You become a scientist with skills across many disciplines, which is great as the future of science is multidisciplinary. The course is small so you get to know everyone really well, and this leads to an amazing community.

Ellie, from Hampshire, studying Natural Sciences.

I chose Natural Sciences at Exeter because of the variety of modules available, with options that I knew I'd enjoy and the chance to try new things. It's really broadened my knowledge across all sciences, especially physics which I didn't have an A level in.

Lucie, from Manchester, studying Natural Sciences.

NEUROSCIENCE

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/neuroscience 

Medical Sciences teaching laboratory, St Luke's Campus

Professional training year in the UK or abroad open to all students.

Interdisciplinary learning – Neuroscience, Medical Sciences and Biosciences.

Research-inspired teaching – part of our research community from day one.

Small group learning – independent learning, teamwork, collaboration and communication.

EXAMPLE MODULES:

- Anatomical Sciences
- Chemistry of Life
- Cognitive Neuroscience
- Fundamental Skills for Medical Scientists
- Integrated Human Physiology
- Introduction to Genetics
- Introduction to Neuroscience
- Neurobiological Rhythms
- Neuroendocrinology
- Neuropharmacology

EXAMPLE CAREERS:

- Postgraduate study: MSc or PhD
- NHS-entry: Scientist Training Programme (STP), or Graduate Management Training Scheme (GMTS)
- Industry:
 - Clinical Trials
 - Research and Development
 - Sales and Marketing
- Scientific Officer or Advisor: Public, Private or Third Sector
- Graduate entry to Medicine or Dentistry

Why not consider?... Biosciences on page 70 | Medical Sciences on page 110 | Psychology on page 128 | Sport and Health Sciences on page 134

As you read this page, environmental stimuli are being detected, converted to electrical signals and passed through your nervous system.

Our Neuroscience course has been carefully designed to share the latest ideas about how biological processes in nervous tissues enable the life we see and experience all around us.

Understanding these processes better could transform healthcare – and illuminate what it means to be human. These are substantial challenges. To meet them, we use small group teaching to help you develop your subject knowledge and capacity for critical thinking.

Underpinning this is our commitment to research-inspired teaching. We do not want to simply share information with you – we want you to be part of the process of scientific discovery.

I've enjoyed the course immensely, finding it challenging yet thought provoking, and my favourite part of the course so far has been the small group learning sessions, helping to develop our knowledge of human physiology.

Hana, from Hampshire, studying Neuroscience.

In our third year we have the opportunity to carry out a professional training year. I'm looking forward to hopefully studying abroad.

Lucy, from Ayrshire, studying Neuroscience.

NURSING

For full programme, module and entry requirement information visit: exeter.ac.uk/ug/nursing

Training at our state-of-the-art Clinical Skills Resource Centre

Option for dual registration as Adult Nurse *and* Mental Health Nurse.

Graduate with MSci demonstrating excellent grounding in research that underpins professional practice.

Development of practical skills in simulation environment and in a range of care contexts, including elective placement opportunities in the UK and overseas.

NMC Nursing & Midwifery Council

Accredited by the Nursing and Midwifery Council (NMC).

EXAMPLE CAREERS:

- Registered nurse leading care in a wide range of care contexts, for example, the community, hospital, hospice, prison or care home
- Registered nurse leader working overseas, for example, in conflict zones or global emergencies
- Advanced Nurse Practitioner (ANP)
- Approved Mental Health Professional (AMHP)
- Nurse specialist working with people with specific health challenges, for example, cancer, dementia, depression, eating disorders, infectious diseases, long-term conditions
- Public health nursing
- Mental health services
- Nurse consultant
- Chief Nurse Fellow
- Nurse researcher
- Nurse educator
- Continuous Improvement Practitioner

Why not consider?... Medical Imaging (Diagnostic Radiography) on page 108 | Medical Sciences on page 110 | Psychology on page 128

If you want to make a profound difference to the lives of people needing health and social care, and can imagine yourself leading a team in a busy accident and emergency ward, mental health service, hospice or care home, our four-year MSci in Nursing might be the course for you.

Our unique programme gives you the enhanced knowledge, skills and values required to be a nurse leader with dual registration in adult and mental health nursing. You will graduate with the confidence and competence to respond compassionately and effectively to health and social care needs including cancer, diabetes, arthritis and depression. You will gain sensitive understanding of the fundamentals of care and the relationship between physical and mental health in conditions like eating disorders and dementia.

We educate our nurses to be leaders, pioneers and professionals, equipped to deal with complex situations like global pandemics. Our nurses are compassionate and courageous, resilient and research-minded, dedicated and ambitious. They are committed to social justice, and to leading and delivering the best possible care in all circumstances.

When I looked at the course it just looked like it was really well laid out and I love that it incorporates a Masters degree as well; not a lot of them do that.

Yasmin, from Somerset, studying Nursing.

Philosophy asks the questions most essential to human life. Studying Philosophy with us will teach you to think rigorously, to defend your views in a clear and consistent way, to understand the why and what-for of different points of view, and ultimately to develop a sharp, analytical and open mind.

Based in the Department of Sociology, Philosophy and Anthropology, our unique environment encourages a productive fusion of the three subjects. This creates cross-over research domains like the field of music, aesthetics and cognition, which researchers with diverse disciplinary training pursue together.

The thing I enjoyed the most about my degree was the way my professor encouraged me to use what we learnt in class as a platform to develop my own ideas.

Giuseppe, from Italy, Philosophy and Politics graduate.

Why not consider?... Engineering on page 88 | Mathematics on page 106

Physics seeks to answer the biggest questions the human race has ever asked, and provides much of the knowledge and technology that underpins our civilisation, from spectroscopy used in healthcare to mapping our planet's position in the universe.

Our close-knit and supportive department focuses on research-led learning, exposing you to cutting-edge ideas and encompassing a broad range of experimental, computational and theoretical physics.

We'll help you to thrive in our department, offering guidance throughout your degree and providing a stimulating and supportive environment for you to develop the investigative and problem-solving skills that characterise a scientific mind.

Physics at Exeter was the obvious and best choice I could have made to pursue my interests. The independence and resourcefulness that university life teaches you is unparalleled in preparing you for real life, acting as a real stepping stone for growing past living at home.

Luke, from the UK, Physics graduate.

Physics is challenging but it's the most rewarding degree you could choose! I'm considering going into researching exoplanets after I graduate and chose Exeter because of its reputation for being at the forefront of research in astrophysics. Exeter has been really diligent in preparing us for life after university; we've had workshops to prepare us for a range of scenarios we will inevitably encounter, such as presenting your work and research to a group.

Isabel, from Surrey, studying Physics with Astrophysics.

From the rise of nationalism to the critical threat of climate change, there has never been a more important time to study politics. Our highly ranked department offers degrees in both Exeter and Cornwall, and our expertise includes extremist propaganda, authoritarian systems and climate change politics.

We use cutting-edge methods like brain imaging, big data analysis and experimental approaches in our research, which feeds our teaching. Our Penryn Campus offers something completely different to any other UK university: a Russell Group degree on an intimate scale in beautiful coastal surroundings.

Being taught key issues in contemporary politics from leading researchers in the field means that the lectures are always filled with exciting, up-to-date information and debates. The lecturers also tend to include unconventional assessment methods which I incredibly enjoy, such as writing a Foreign Policy recommendation to Donald Trump, or being part of a simulated peace process. Not only is this a refreshing change from writing essays, but it also prepares us for practical tasks that are commonplace in the world of work that encapsulates politics and international relations.

Bettina, from the UK, studying Politics and International Relations with Study Abroad at our Penryn Campus.

¹ Graduate Outcomes data from 2017–18 graduates, surveyed 15 months after graduating.

Psychology plays an important role in addressing complex questions about human and animal behaviour. You'll be taught by researchers in social, cognitive and clinical psychology.

Our MSci Applied Psychology (Clinical) is a dual accredited programme with the British Psychological Society (BPS), incorporating a Psychology degree with clinical training and a fourth-year placement, leading to qualified Psychological Wellbeing Practitioner status. A link between the applied psychological practice centre, Clinical Education Development and Research (CEDAR), and the Psychology department enhances the journey.

In the final year of BSc Psychology you will work with a partner on an extended research project that has the potential to result in truly novel discoveries – many final-year projects have subsequently been used in published research articles.

There is a lot of flexibility with the dissertation topic, allowing you to choose an area of the Psychology course that you have found the most interesting over the previous years of study. Proposing my own research question, finding a way to test this and analysing the implications of my results was a truly unique opportunity.

Isabelle, from the UK, studying Psychology.

Why not consider?... Electronic Engineering on page 88 | Engineering and Entrepreneurship on page 88 | Mechanical Engineering on page 88

¹ The Guardian League Table 2021.

Clean energy, generated using renewable sources and new technology, promises a solution to the global energy crisis and is fundamental to the future of our planet.

Our Renewable Energy degrees cover a full range of topics from solar, marine and wind generation to policy and governance within the energy sector. We're passionate about this subject and are proud to offer one of the only degrees of this nature in the UK.

Based at our beautiful Penryn Campus in Cornwall, you'll get first-hand experience from access to the region's many specialist renewable energy laboratories, wind farms, solar photovoltaic systems and offshore test sites.

The technical skills you'll learn as part of this degree, as well as the knowledge gained through exposure to the challenges currently faced by industry, will open doors to a wide range of careers.

I love my course as it's so practical – I really feel like I'm applying the knowledge I'm gaining into practice. We do lots of hands-on work learning how to put up wind turbines or how to build solar panels and motors. I've learned loads of new skills like soldering and riveting, which is all important for my future career.

The support from lecturers has been great. As it's a developing field there is always a lot to discuss, we're encouraged to ask questions and they always turn into open discussions with the whole cohort.

Sara, from Dubai, studying Renewable Energy Engineering.

¹ Graduate Outcomes data from 2017–18 graduates, surveyed 15 months after graduating.

We consistently rank as one of the UK's top Sports Sciences departments, as well as being one of the best sporting universities in the country. You'll benefit from an innovative and holistic scientific approach to the understanding of sporting performance, exercise and health – combined with an excellent general education that can lead to a wide range of employment opportunities.

Our extensive facilities include purpose-built laboratories for sport and exercise physiology, sports biomechanics, and health and performance psychology. Our academics work closely with industry and world-class athletes, further enriching your experience.

The Sport and Health Sciences department is great. The lecturers are welcoming and always want to talk to you and get to know you better. The facilities are top-class and the University really cares about our opinions. You can really throw yourself into university life here as you make some amazing friends on the course.

Ben, from the UK, studying BSc Exercise and Sport Sciences with Study Abroad.

Religion shapes the world we live in, and all religions raise ethical and philosophical questions that are among the most fundamental we face.

When studying Theology and Religion at Exeter you will work as a historian, anthropologist, literary critic and philosopher, gaining all the essential skills you need to be fully equipped for a wide range of future careers.

Our stimulating degrees, grounded in our expertise in the Abrahamic faiths and taught by a team of world-renowned academics, ensure you make constant connections with the contemporary world through field trips to places of worship, and our dynamic research centres host a series of events and seminars by leading scholars.

The friendliness in the department, and the extent to which professors go out of their way to help and guide you, is simply fantastic. I have always felt that I can approach my professors and personal tutor for nearly anything.

George, from Worcestershire, studying Theology and Religion.

People in the department pretty much know your name by the end of the first day. The teaching has also been phenomenal, and you can tell that the lecturers are very invested and interested in their subjects.

Ebun, from London, Theology graduate.

INTO  UNIVERSITY OF EXETER

International students who need to improve their academic grades or English language skills for full entry to the University can apply for an INTO University of Exeter pathway programme to prepare for degree study. Offers are made on an individual basis but we will require evidence of academic success and competence in English.

At INTO Exeter, I knew I'd be able to gain access to everything the University students had, such as the vast library and facilities, all while also getting that one-to-one attention you get at INTO. It was the best way to start my university experience.

Sara from Bahrain, completed International Year 1 Management and Business Economics, progressed to BA Business Economics, graduated 2020.

International Foundation

International Foundation pathways allow students to progress to the first year of a wide range of degrees at the University of Exeter.

Completion of 12 years of schooling or equivalent	<p>Biomedical; Life and Environmental Sciences; Economics, Finance and Management; Engineering, Mathematics, Computer Science and Physical Sciences; Humanities, Law and Social Science; Mathematics with Economics, Finance and Management</p> <p><i>Award and validating body: International Foundation Certificate (RQF Level 3) from the University of Exeter</i></p>	
---	---	--

COURSE LENGTH	START DATE	IELTS REQUIREMENT
2 terms (Foundation (Fast-Track) – equivalent of all Foundations, with articulation to over 150 degree routes)	March	6.0 (with a minimum of 5.5 in all subskills) or equivalent
3 terms	January / September	5.5 (minimum 5.0 in writing and 4.5 in all other subskills) or equivalent
4 terms	June / September	5.0 (with minimum 4.5 in all other subskills) or equivalent

HOW TO GET HERE >

All our campuses are well connected by road, rail and air travel.

Streatham Campus and St Luke's Campus, EXETER

Both campuses are within easy walking distance of the city centre.

By train

The average journey time from London Paddington to Exeter St David's station is 2 hours 30 minutes.

By coach

Exeter is well connected by coach, and local buses from the coach station can take you direct to either of our campuses.

By car

The M4/M5 links Exeter directly to London, the Midlands, South Wales and the North, including Scotland. The average journey time from either London or the Midlands is 3 hours.

For satellite navigation use postcode EX4 4QJ for the Streatham Campus and EX2 4TE for St Luke's.

By air

The nearest regional airports are at Exeter and Bristol.

Penryn Campus, CORNWALL

By train

There are regular services to Truro from all major British cities, and connecting services from Truro to Penryn. The average journey time from London Paddington to Truro is just over 4 hours, and from Truro to Penryn about 15 minutes.

By coach

For timetables visit nationalexpress.com/en or phone National Express on +44 (0) 8717 818181.

By car

The Penryn Campus is approximately a 2-hour drive from Exeter. For satellite navigation use postcode TR10 9FE or TR10 9EZ.

By air

The closest airport to the Penryn Campus is at Newquay.

European travel

All our campuses are easily accessible from London by road and rail. Exeter airport (Devon) and Newquay airport (Cornwall) have direct flights to UK and European destinations. Bristol airport (1 hour by train from Exeter) has direct flights to 100+ destinations.

For full instructions and directions to each campus:
exeter.ac.uk/visit/directions ↗

VISITING US >

How to book your place

Booking is essential for all our events. There are limited places available for all our events and tours so it is important to book your place in advance to avoid disappointment.

Streatham and St Luke's campuses in Exeter, Devon

Phone: +44 (0)1392 724043

Campus tours

Under normal circumstances we run campus tours at the Streatham Campus each weekday, at the St Luke's Campus on Tuesdays and Fridays during term time, and at the Penryn Campus on Wednesday and Friday afternoons. You'll be shown around by a current student, who'll give you a first-hand account of what it's like to live and study at the University.

We can provide a brochure to allow you to undertake a self-guided campus tour or you can view a virtual tour of our Exeter campuses: exeter.ac.uk/ug/visiting/tours

DISCOVER UNIVERSITY

During pandemic restrictions when campus visits are impossible, we run online events. Keep an eye on our website for details. You can also explore our Discover University platform: exeter.ac.uk/discoveruniversity ↗
