

# Study At Oregon State University Through The **SAUDI PATH OF EXCELLENCE SCHOLARSHIP**

Positioned on the West Coast of the United States just minutes away from the Pacific Ocean, Oregon State University is the ideal location to begin your studies in Marine Studies and Ocean Science. Both majors are approved for the Saudi Path of Excellence Scholarship. Are you not sure which major is the right fit for you? See the descriptions below for more information.

## OCEAN SCIENCE

### Earth Sciences

#### Ocean Science Concentration B.S.

Our oceanography program, **ranked No. 3 in the world**, can take you from coastal mangroves in the tropics to the ice-covered poles. Oceanographers study all aspects of the marine environment and how it interacts with and influences the Earth and human populations.

Because the ocean is a vast and challenging place to explore, ocean scientists use a variety of approaches to study it, including satellite remote sensing, computer modeling, research ships, cabled observatories, and state-of-the-art instrumentation. As an Ocean Science major at OSU, you will be exposed to the tremendous breadth of the marine realm and the diverse ways scientists study it.

## MARINE STUDIES

### Marine Studies B.A./B.S.

The Marine Studies degree program brings together natural and social sciences to create a program focused on all aspects of the marine environment. Students focus on the social, political, and cultural issues of coasts and oceans in the context of a meaningful understanding of marine natural science.

Majors in Marine Studies will develop broad-based knowledge and skills in the natural sciences, as well as gain expertise in the humanities, arts, and the social sciences. They will be able to apply these approaches to study the way humans interact with the marine environment.
