

Sawsan Alshayeb

I just finished my Bachelor's degree in Civil Engineering at the University of Technology Sydney, Sydney, NSW, Australia. I have studied Civil Engineering at Concordia University in Canada for 2 years. However, due to the unfortunate issues between Saudi Arabia and Canada and as a Saudi scholar in 2018, I had to leave the country within a month and change the University. I have worked hard and did my best from transferring these circumstances and sudden changes and create a better experience that exposed myself to worldwide cultures. I have already studied specialized subject in the Project Management field, as shown in the attached files. I love the subject and I am keen to develop more by studying project management. After informing myself about the programme at this University, I am convinced that studies there would meet my goals. Therefore, I would like to join your Project Management programme.

In addition to my strong interest in engineering studies, I am a very active person. I have been a member of the Saudi club in Montreal, Canada and in Sydney, Australia where I organize meetings and lead programmes and participate as an artist in different events. My excellent communication skills allow me to deal with different personalities there and in other endeavours. Also, I have volunteered to work as a crafts teacher for children; this work allows me to express my creativity and efficiency. I have great skills in drawing and designing. Recently, I have been doing 3D modelling, I have develop my skills for 3D printing in my Capstone final project. As this permits me to unite my inventiveness and love for engineering. Drawing and designing are my favourite hobbies besides music.
