Finance and investment have been gaining my attention from an early age. Since I was 12 years old, I accompany my father to his own business. I learn considerable from him that created inside me a love of trade, investment, financial science knowledge, and its management methods. At present, I have my own business. I have applied everything that I have learned by education or experience to my foundation. In addition, I will learn more to develop my personality and work. Developing myself by academic studding, books reading, news following, and work experience are extremely important to reach my purposes.

Education is the optimum key of the knowledge. In the second year of my high school, I chose the business and administration path to be my major. I am an excellent with numbers and scored 97 out of 100 in GAT exam math section. GAT is a requirement exam to get a university acceptance in Saudi Arabia. In September 2007, I got my acceptance at Al imam Muhammad Ibn Saud Islamic University. Studying at the university prompted me to attend training courses and scientific seminars to improve my skills and knowledge. In January 2012, I achieved my university certificate in banking. In Jun 2014, I earned my Diploma certificate in English language from University Of California, San Diego (UCSD). For me, important and influential to continue learning and follow incoming updated. Yearly, I read several books on investment, financial markets, and startup businesses. I belief that the news are one of the most impact important elements of the markets so I follow them carefully and deeply.

Implementation is the real experience in my perception. Positive results are evidence of success. I am eager to work in various places to get more experiences. I have been working with my dad for nineteen years. When I was a university student, I signed an eight-month contract with a government ministry. Moreover, I acquired an opportunity to work with small establishments. March 2015 to March 2017, I got a Function in the biggest bank in Saudi Arabia. This job increased my cognition and skills in finance institutions. In January 2015, I established my own investment business. In the beginning, the business was very small. Right now, my foundation divided to four types of businesses. First, financial investment, which works into Saudi stock market, and lending small companies. Second, services provided as outsources for small companies, majored into finance consulting, accounting, human resources, administration, and marketing. Third, retail focused on selling smartphones and providing their services. The last, information technology, which provides technical solutions for companies, and end clients by establishing applications and software systems.

Education grow up the knowledge, skills develop by experience. Finance and investment is a love occupied me for years. Obtaining a master degree in Finance and investment sciences will move me to higher stage. I will be better for thinking, understanding, explaining, innovation, and many uncountable. Earning this knowledge and this certificate will influence incrementally my business and personality.
