

To whom it may concern,

I have known Mrs. Taghreed Mazyad H. Alhuzaymi since 2022 as a trainee at the Institute of Nuclear Science Research Institute (NSRI) in King Abdulaziz City for Science and Technology (KACST), which is considered the National Laboratory of Saudi Arabia.

Mrs. Taghreed Mazyad H. Alhuzaymi started at NSRI as a trainee in 2022 as soon she developed good knowledge of the preparation, characterization and evaluation of nanofiltration (NF) membranes. In addition, she improved her knowledge to use different analytical equipment in the Radio-chemistry Lab including scanning electron microscopy (SEM), Fourier-transform infrared spectroscopy (FTIR) and Thermogravimetric analysis (TGA). In additional, she evaluated of the RO/NF membranes using crossflow system. Mrs. Taghreed Mazyad H. Alhuzaymi has great commitment and dedication to her training. She communicates very well in Arabic and English and she can work independently or as member of research team quite well. She is always seeking improvement of her scientific capability. I strongly recommend her for Postgraduate.

Sincerely yours,

Dr. Ahmed Ali Alshahrani
