

I would like to begin this personal statement by introducing myself to you briefly, my name is Wafaa Dahlawi. I have recently graduated from the University of Jeddah in 2022 with a Bachelor's degree in Law and Judicial Studies and an accumulative GPA of 4.8/5 with first class honor roll. Further, I would like to continue my academic journey by acquiring a Master's degree in International Corporate & Commercial Law from your esteemed institution, King's College London. In the following lines, I will introduce myself a little more, my experience, and skills.

The question of right and wrong defines acceptable modes of behavior in life, which is a constantly changing maze. Yet, what distinguishes right from wrong? What factors are determined when something is fundamentally correct or incorrect? The solution is solely on the law. The ongoing struggle to maintain order in a constantly changing society is the driving force behind my interest in law and related fields. My desire to positively contribute and have an impact in an expanding field influenced my decision to pursue a Master's degree in International Corporate & Commercial Law. The reason behind my choice other than passion is that the enormous business advancements in all economies and its relation to International Corporate & Commercial Law will benefit my professional career.

I am proud of the experience I have gained throughout the years while I was acquiring my Bachelor's degree. I have worked as a Human Resource Manager for four years by volunteering at The Joy of Youth organization; which is a non-profit volunteering organization that focuses on humanity and maintaining a healthy society. Afterwards, I worked as a manager at a local café named Done Café for nine months. Further, as a senior student I started gaining experience in the field of Law more and since I graduated, I started working and interning in law firm businesses. I joined the Fawaz Aldanish law firm, where I received 120 hours of co-op training. I was in charge of gathering client information, organizing a monthly professional trial, and producing reports.

By this point, I had developed a variety of strong interpersonal and social skills in addition to technical skills, as I have attended nine different courses about Law fields. Also, I have gained research and analytical skills in the legal field. Other skills I've acquired including effective communication in all forms, problem-solving, and collaboration with others. All of my experiences have helped me to develop advanced skills required in the field of International Corporate & Commercial Law. As a result, I decided to broaden my academic and professional knowledge of International Corporate & Commercial Law by attending higher education courses.

I choose to obtain my Master's degree at King's College London for its rich program in International Corporate & Commercial Law. The outstanding expertise and experiences of your respected university's instructors will help me achieve my goals and strive for excellence. It is an honor to be admitted to your prestigious university and to be a part of your future success and prosperity.

Sincerely,

Wafaa Dahlawi
