

ALZHRANI, SALEH MOHAMMED A – Statement of Purpose Letter

The reason behind the introduction of a master's degree at the University Swansea is due to my strong desire to expand the database of information I have in the specialization of Human Resources Management, which will make me successful in the professional aspects of the future, especially since this area needs constant reading, and the identification of everything that is new, preferably if the study is a master.

Therefore, I obtained my Bachelor's Degree in Economics from Umm Al-Qura University in Saudi Arabia and graduated with a strong standing in 2014. Throughout my studies, I had the chance to take courses in various areas including marketing, finance, accounting, economics, strategy, human resource management, project management, and management information systems. As well, the group projects and assignments helped me develop strong team working and interpersonal skills while learning how to use various computer software and spreadsheet applications. I also learned how to develop business plans, budgets, and feasibility studies for new ventures.

I worked in the job of Human Resources management after graduating from the university, and I developed work in the field in collaboration with colleagues in Human Resources. I received a lot of material and moral estimates of my manager's work, and in those, I would like to re-study and obtain a Master's degree through your University, which I have read extensively about. I also have seen all the conditions required by those responsible for your master's degree, all of which apply to, and the financial ability to pay tuition regularly, and there are no problems with that, knowing the absolute commitment and diligence, and perseverance in respect of the study, I also like the atmosphere of educational competition and the constant knowledge of everything that is new.

As English was my second language, I made sure that I focused on improving my language proficiency before enrolling in a university. For that reason, I joined the ELI of California State University program and the ELC in LA program where I had the chance to practice my verbal and communication skills while mixing with others, practice writing essays, and develop reading skills with attention to details. As such, I am quite sure of my success ability, and potential to tackle the language very confidently.

As I am very ambitious to upgrade my knowledge and pursue a successful career, I would like to be considered for the Master of Science in Human Resource Management degree program at your reputable University. I am very keen on advancing in my career and I very well understand, that in today's competitive and global job market, there is a substantial and proven need for advanced degrees to compete and succeed. Also, I have taken the time to review many programs and universities and I finally landed on your university because I am confident of your faculty's ability to deliver excellent education, diverse material, and up-to-date knowledge. This makes me feel very excited and I anticipate to hear good news from your admission committee soon!
