Total Score	2380

Situational Judgement

Band 4: The performance of those in Band 4 was low, with judgement tending to differ substantially from ideal responses in many cases.

UNIVERSITY CLINICAL APTITUDE TEST INFORMATION

UCAT SUBTESTS

Verbal Reasoning evaluates your logical-thinking skills by assessing your ability to critically evaluate information that is presented in a written form.

Decision Making assesses your ability to apply logic to reach a decision or conclusion, evaluate arguments and analyse statistical information.

Quantitative Reasoning further evaluates your logical-thinking skills by assessing your ability to critically evaluate information that is presented in numerical form.

Abstract Reasoning assesses the use of convergent and divergent thinking to infer relationships from information.

Situational Judgement Test measures your capacity to understand real world situations and to identify critical factors and appropriate behaviour in dealing with them. The subtest focuses on integrity, perspective taking, team involvement, resilience and adaptability.
