

Statement of Purpose

This is Yousef Hisham A Dhulaymi from Saudi Arabia. I have completed my Bachelor's Degree in Applied Engineering from Technical Trainers College in Riyadh, Saudi Arabia in the year 2020 with CGPA 4.22 out of 5.00. I want to study **MSc Management and Implementation of Development Projects** from **University of Manchester** for the intake year **September 2023**. Having a clear vision always helps setting goals and clarifies the way to achieve them, mine is to be a successful member in the society doing the best I can in what I love for myself, my family and my country. After being involved in both technical and operational sides of engineering, I still feel the need for lack of management competencies so my goal is to master in Development Projects Program which will provide the required balance in my knowledge and the proper tools for future improvements and developments

I earned the degree of Bachelor of Science in Applied Mechanical Engineering from Applied Engineering College in Riyadh and worked as a Production Engineer in the Production department for IFFCO Company where I practiced my knowledge in various areas in my field. I gained an intensive operational knowledge working with Arab Malaysian Vegetable Oil Products field engineer which was a rich experience for me. In all that, I have been involved in projects and teams being either a member or leader and dealt with different types of management and managers in a diverse environment and experienced the effects of management on both technical and operational sides of business either with a good or bad impact. For that and more, I want to master in Engineering Management program which will provide the proper tools and techniques dealing with technical, operational, financial and human performance considerations.

After intensive research, I am glad to select **University of Manchester**, England for pursuing studies in MSc Management and Implementation of Development Projects as this is one of the University which offers this course. It is a public research University also a part of Russell Group of universities and highly respected across the globe as a center of teaching excellence and research innovation and discovery. The course offered by University of Manchester presents powerful tools, materials and latest advances that cover all areas and topics that interests me, moreover, it is a challenging program which will explore my horizon to new levels of knowledge that will be applicable in real life. Saudi Arabia has vision 2030 which opened the door for many international companies and investors in all fields especially in the oil industry. Since then, there are a lot of ongoing projects all around United Kingdom and the demand for highly qualified engineers is increasing accordingly. I want to contribute in this industrial revitalization in all applicable aspects technical, operation, management and development.

I am interested to study in the UK because of the Amazing education quality and reputation, welcoming culture, Shorter degree, distinguished universities, varieties of courses, travel connections, work opportunities, higher educational standard, and people who are very friendly and helpful. The UK has an excellent reputation to build people in almost every sector. UK higher education degrees and qualifications are recognized by employers and academics worldwide. I chose Britain to be the next step to achieve my professional career objectives and academic goals. The United Kingdom is a very developed country with an environment fit for mental and intellectual growth. UK has one of the best standards in terms of education in the world and their school certificate are accepted anywhere, therefore causes employment to their students anywhere they find themselves in the world. British university are known with solid foundations which over years is still keeping up and students testify that they boost ones potential and find the exact job they want. UK is an academic environment that is research oriented and known to be in depth and detailed in their delivery.

After completing this course, I will come back to my country and assist with the knowledge that I gained from the well-known university. I think my wish, interest, previous study experience, passion, and the dedication will be considered. I would be highly obliged if the university admission committee accept my application and issue an offer in **MSc Management and Implementation of Development Projects in University of Manchester** for **September 2023** intake.

Thank You

Yousef Hisham A Dhulaymi
