

June27, 2020  
Applied Engineering College  
Riyadh, Saudi Arabia

To whom it may concern,

It is my pleasure to recommend one of the most delectated students who I taught him in terms 3 & 4, and 6. I know (Yousef Hisham Dhulaymi) very well when I taught him the " Advanced Material & Testing of Engineering Materials " & "Plant Management" courses in the Mechanical Technology Department at Applied Engineering College Riyadh SA.

He showed an excellent knowledge with strong laboratory skills and focused vision in the delivery of the new engineering matter innovation topics at both class and practic.

I believe Yousef Hisham Dhulaymi will be an excellent candidate for any job or further study program considering his activity in the class, which is meeting the academic standards.

Sincerely,

Dr. AbulSalam Mahmood  
PhD, P. Eng.

To whom it may concern;

It is a pleasure to write a letter of recommendation for Mr. Yousef Dhulaymi either for graduate studies or for working position. Mr. Abu Jabal has been my student for three years between 2019-2020, during which I taught him Metal Forming and Cutting; Fluid Dynamics-5; Electric Hydraulic, Pneumatic Control, Workshop-5 and Thermodynamic.

Based on my observations, I can attest that he is a highly intelligent, sincere and hard-working person with a tremendous drive to reach his goals. He is a keen observer and has the requisite aptitude to take up any difficult assignment in the field of study or work that he is passionate about. He enjoys the scientific processes and has the ability and willingness to see both on the fine-detail scale and The Big Picture.

On a personal level, Mr. Yousef Dhulaymi is a well-rounded person, with a lot of enthusiasm for sports and extra-curricular activities. He has also shown his adeptness at organizational skills, especially in a cross-cultural setting. He is approachable and easy to communicate with.

I have a strong opinion that he has the right aptitude to excel either in graduate studies or working position and, hence, strongly recommend him for starting at your organization.

I wish him grand success in all his future endeavors.

**Ghassan Alhassan, PhD in Mechanical Engineering**

Applied Engineering College (AEC), Lincoln International Mechanical Department Technology
