

Letter of recommendation

As a project manager at Saudi Aramco Company which is one of the largest oil Companies in the world. I have worked with Akram Al-Salmi since 2001. We started as engineers at Abqaiq Plants in Saudi Aramco Company and Akram was Chief Maintenance Engineer.

I can describe Akram a business savvy individual, always passionate about his job, a leader by nature, has an excellent analytical skills, proactive, excellent communication and problem solving, achievement driven professional.

During our work in Saudi Aramco Abqaiq Plants, I have seen Akram demonstrating strong leadership and communications skills. There was an instance when a contractor at another area which Akram was not covering not performing well and his job took more than two years while it should be finished by only 9 months. Akram took over that area from that maintenance engineer and then immediately took the decision to terminate the contract with that contractor after assessing that contractor performance. Akram immediately assigned another contractor and this contractor finished the job within 8 months under the supervision of Akram. I remember, Akram was recognized by the upper management.

For these reasons among many others, I highly recommend him as a candidate for the master program in your university. If you have any further questions, please feel free to contact me.

With best regards,

Hasan Al-Sharif
Project Manager
