

A Letter of Recommendation

To Whom It May Concern

It is my pleasure to recommend Abdulaziz AlDakheel. I have known the candidate since the beginning of the scholastic year 2021-2022. I know him \_ and thus\_ I can write about him and recommend him from two different perspectives: as a teacher and as a counselor and career guidance officer. To begin with, I am Abdulaziz's teacher of social studies. In grade 11, our course was *US History and Geography*, and presently Abdulaziz is studying *Geography: The Human and Physical World*. In both courses, the candidate has shown deep knowledge and understanding of global affairs. He is an active participant in the classroom discussions and especially when it comes to political, economic, and cultural affairs. He always shows openness towards other cultures, and he is keen to know more about world affairs.

As a counselor, I can definitely say that Abdulaziz owns some outstanding qualities and traits such as love of learning and acquiring new skills and leadership traits. The candidate is always keen to acquire and develop the basic skills needed for every student. For example, in June 2021, Abdulaziz attended a one-day workshop in "Occupational Simulation Initiative" under the supervision of Misk Foundation (Mohammed Bin Salman Foundation). In October of the same year, the candidate also attended a "Professional Simulation Day" in which he learnt the basic skills of professional planning and research in addition to business development and solutions, also under the supervision of Misk Foundation.

In 2022, Abdulaziz was also keen to develop more and more skills. In April, he completed the requirements for "Financial Analysis" \_ a program entitled under "Future Path Career Essential Program" delivered by Misk Foundation. In July, he attended a 15-day program in Oxford Royale Academy about "Inventing the Future: Business, Innovation & Entrepreneurship". Last but not least, Abdulaziz has volunteered as an organizer and receptionist for 5 hours at UKuni UK Universities Roadshow.

Abdulaziz is a dedicated and hardworking student. He saves no time in seizing opportunities for self-development.

As a career guidance officer in Najd National Schools, I have lately conducted a "Multiple Intelligence Quiz" and a "Career Assessment Survey" for our senior students. Abdulaziz has high Logical/ Mathematical Intelligence in addition to Interpersonal and Intrapersonal Intelligences. Based on the candidate's logical/ mathematical intelligence and his love and interest in categorization, classification, and calculation, I believe that Abdulaziz will successfully complete the requirements of finance and / or accounting majors in any university he joins in the future. Abdulaziz is an added value for our school, and I am sure he will be so for any university he joins in the near future.

I highly recommend Abdulaziz AlDakheel without any hesitation.

Kindest regards,

*Mazen Bsot*

Teacher / Student Counselor & Career Guidance Officer

Najd National Schools for Boys / International Program
