Dear Admissions Committee,

I have had the pleasure of knowing Norah for the past three years as a member of the Students' Council. She served as vice president and secretary. She has also participated in the Model United Nation Institute (MUN). I am Norah's chemistry teacher, and I have been teaching Norah both physics and chemistry since she was in Grade 10. Over the course of those three years, I have come to know her quite well and have watched her grow and develop into the amazing young lady she is today. Norah's endless curiosity, her leadership, and social skills, combined with her willingness to take initiatives, lead me to believe there will be no limit to her growth and achievements in college and beyond.

Since Grade 10, Norah has impressed me with her ability to discuss and give solutions to different concepts and problems in such a mature and critical way, with a unique and witty sense of humor. She possesses confidence that many of her peers lack and is always eager to partake in class discussions. She has shaped her skills in discussion by making meaningful arguments, and this has been proven as she won a prize as the Best Debater.

Watching her work with her peers while taking part in organizing many school events, both social and charity ones, showed me the level of organization and planning skills she possesses. Her way of captivating students and achieving the objective of each function amazed me. She had skills that even some adults wouldn't be able to achieve.

Norah's personal strengths are as impressive as her intellectual accomplishments. She has pursued her passion for psychology by enrolling in prestigious courses offered by both Yale and Cambridge universities. She has always spoken about her passion for psychology, which has impressed me as she pursued her passion rather than having it solely as an interest.

Examining her resume, you can notice how active and goal-oriented Norah is. She has organized, founded, and trained in different areas that would eventually help her community.

I hold Norah in the highest regard and strongly recommend her for your foundation program, where I feel confident that she will continue to apply herself to the best of her ability. For all the aforementioned reasons and more, I believe that Norah would be an important asset to your institute. If you have any further inquiries, please feel free to contact me.

Sincerely,
Alshamaa Ali Alazzam
