Re: Recommendation Letter for Mr. Ahmed Adel Al Jumaiah

To Whom It May Concern,

It's my absolute pleasure to recommend Ahmed Adel Al Jumaiah for any job requiring his skills and qualifications.

I have known Ahmed Adel Al Jumaiah more than 3 years now, from March 2019 to November 2022. Ahmed was doing a final year project (Engineering Capstone Project Subjects 4A & 4B) supervised by myself, in the area of the estimation of the remaining service life of high voltage insulators with/without silicone coating for power transmission and distribution systems, delivering a mathematical model based on the results were obtained from the electrical tests method. I have taught him different subjects and been linked with him in different lectures, tutorials (Circuit theory, Power Systems Analysis and Control, Protection and High Voltage Engineering, Introduction to Electrical Building design, and Renewable Energy Systems). In this long association, I had ample opportunity to assess his professional and personal abilities, and I must say Ahmed has shown excellent interest in all his scholastic pursuits. He is a person with very good grasping and analysing capabilities.

He was a student with extraordinary capabilities and a practical approach. He was a hardworking and team-oriented kind of person. As a student, he was dedicated to his assignments given to him and finished them on time. Perseverance, sincerity, and thirst for knowledge have always been the hallmark of his personality. He has also taken seminars in his university days.

Ahmed is a reliable and disciplined person. Further, he has the capacity of adapting himself to a new and challenging environment. With these strengths and his cooperative nature, I firmly believe you would make him a successful candidate for working in your organization. He always wanted to do something better for the betterment of the world and with your organization, he can pursue his dream of making this world a better place for ongoing and upcoming generations of the world.

Yours Sincerely,

Dr. Ghazwan Haddad, PhD, BSc. Eng. (Hons)
Lecturer, Electrical & Biomedical Engineering, School of Engineering (SoE)
RMIT University, Melbourne, VIC, 3001
