Letter of recommendation – Nadrah Aldaeefi

I have known Nadrah Aldaeefi since 2018. Being a MSc student, she attended my (undergraduate) Quantum Optics class and my (graduate) Advanced Quantum Mechanics class. She performed very well in both classes. Nadrah showed herself as an active and hard-working student. We frequently discussed various physics problems beyond the scope of my course, and I was surprised by her analytical abilities and originality of ideas. Nadrah's background in physics is very good. I regard her academic and research abilities as excellent. She is kind and easy going and knows how to integrate into different cultural environments. Nadrah has everything it takes to successfully finish her PhD. I strongly recommend her for the PhD program at your institution. If you have further questions, do not hesitate to contact me.

Yours sincerely,

A handwritten signature in black ink that reads "Thomas Brabec".
