To Whom It May Concern
Re: Ayah Abdullah Alfayyadh
Date of Birth: 13 September 2005

I am pleased to write a recommendation letter for Ayah Alfayyadh, a student enrolled in the American Diploma Program at Jeddah Knowledge International School. I taught Ayah Algebra II Advanced in grade 11.

Ayah's willingness to learn and her dedication to lessons have stood out amongst her peers. I have observed an ability in her to turn challenges into opportunities, exercising a calm and composed demeanor while leading others along in a friendly accepting way. She is a thinker, a planner, and an organizer; Ayah efficiently manages and tackles her tasks despite their sheer immensity. It has been a pleasure having Ayah's presence in my class.

Ayah worked tirelessly in the subject and showed great progress throughout the year. She was always eager to learn more and grasp new concepts. She submitted all her work on time and did them in a very special and creative way which showed how interested she is in the subject.

Apart from Math, Ayah has also undertaken a Business Management and Administration course which helped her gain valuable insights. Being a delegate in MUN conferences has improved her public speaking skills and leadership skills. Her academic performance has in no way been affected by her participation in these extra-curricular activities; rather, she has shown exemplary results.

Aside from school activities, Ayah has participated in community service. She was an admin and accounting volunteer at a local restaurant and a teaching assistant at 'Alnbta Kids Club' which has helped develop her communication and interpersonal skills.

I highly recommend Ayah, as I am certain that she will give excellent results and will prove to be an asset wherever she goes.

Respectfully,

Hanine Assaf
MYP/DP Math Teacher
