

## **statement of purpose**

The purpose behind my application to study MSc critical care degree in the UK is due to my strong desire to expand the database of information I have in the specialization of Nursing, which will make me successful in the professional aspects of the future, especially since this area needs constant reading, and the identification of everything that is new, preferably if the study is a master.

I studied at Glasgow Caledonian University (the UK) and graduated of BSc Adult Nursing studies. I was passionate about my bachelor degree of Nursing, and I have several projects during my university trip, and I have always dreamed that I completed my educational journey in the UK which has great scientific and technical elements, it has many internationally-ranked universities; in addition to the model educational environment, which helps to extract the inherent inner forces, and achieve the stage of creativity

After graduating from Glasgow Caledonian university, I worked as a nurse in Emergency and accident department at King Saud Medical city(Riyadh) which is one of the biggest Hospitals in Saudi Arabia, and I had a chance to practice what I learnt in my bachelor degree in the UK with a great help from Senior staff. I would like to study MSc critical care degree to expand my knowledge and improve my skills in order to identify medical issues, determine severity, and provide immediate long-term effects and, if necessary, even sustain life as a critical care nurse is one of the first responders when a patient is admitted to the emergency room.

I have seen all the conditions required by those responsible for your master's degree, all of which apply to, and the financial ability to pay tuition regularly, and there are no problems with that, knowing the absolute commitment and diligence and perseverance in respect of the study, I also like the atmosphere of educational competition, and the constant knowledge of everything that is new.

Science has no borders, no homeland, and the human being to move and migrate in order to obtain knowledge, and motivated by curiosity innate, and identify that is new, and I continue to follow the impact of successful people.
