To whom it may concern

I'm writing this letter in support for Ms. Roaa Mohammad Abuqazan's application for Graduate study at your esteemed institution. Ms. Abuqazan graduated with a BSc degree in Medical Laboratories Sciences from Jordan University of Science and Technology in February 2022. She joined the BSc program at the beginning of the fall semester of the academic year 2017/2018. Overall, I've known Ms. Abuqazan for about 1.5 years.

I taught Ms. Abuqazan two undergraduate courses; "Medical Parasitology", and "Viruses and Medical Fungi", in which she performed very well. I also supervised her comprehensive field training at the hospitals' laboratories. Furthermore, she continued to perform very well academically and professionally at the other courses in the department, being usually within the top 25th percentile of her class. She graduated with a "Very Good" GPA rating. During the various courses and while working on her various assignments, and field training, she demonstrated intelligence, resourcefulness, dedication, and a great amount hands on skills. Furthermore, she was liked by her colleagues, instructors, and supervisors. Based on her performance in the BSc program, my own impressions, and feedback obtained from other faculty members and instructors, I can confidently state that Ms. Abuqazan is an all-around very good student.

Ms. Abuqazan has a pleasant and easy-going personality and is pleasure to work with. She is meticulous, punctual, and dependable. She has good command of spoken and written English and can express herself well. The program at your esteemed institution would enable Ms. Abuqazan to broaden her horizons, network with other researchers, and obtain new skills and ideas. I'm confident she would perform well and would greatly benefit scientifically and professionally from this opportunity. Therefore, I recommend her application to the graduate program.

Please feel free to contact me if you have any questions.

Sincerely,

Dr. Samer Swedan
