

TO WHOM IT MAY CONCERN

I had the pleasure of teaching **Roaa Mohammad Ahmad Abuqazan** in her bachelor's degree two genetic courses: Molecular Biology and Diagnostic molecular biology and cytogenetic at Jordan University of Science and Technology (JUST). Roaa impressed me with her passion for gaining knowledge and creative expression- both in and out of the classroom. She is a talented student, and she has my highest recommendation to continue her graduate study.

Roaa was an active participant in any discussions, and she always supported her peers. Her caring nature and personality allow her to work well with others in a team setting, as she always respects others' opinions even when they differ from her own. Throughout the year, Roaa demonstrated this openness to and empathy for the opinions, feelings, and perspectives of others, along with insightful powers of observation, all qualities that makes her an efficacious student.

I am certain that Roaa is going to continue to do great and creative things in her future. I highly recommend her for admission to your graduate program. She is talented, caring, intuitive, dedicated, and focused on her pursuits. Roaa is truly a stand-out individual who will impress everyone she meets.
