To Whom It May Concern
Re: Yousof Jihad Abuzeid
Date of Birth: 25 January 2005

I am pleased to write this letter of recommendation on behalf of Yousof Abuzeid, a most promising student. I had the pleasure of teaching Pre-Calculus to Yousof during his grade 11. He has a winning attitude full of drive and perseverance that is unparalleled. He is always attentive in class and has a knack for engaging the whole class in participation.

Yousof has the attributes to be a good business student. He is a self-driven student at school. He is able to manage his school workload and has the self-motivation to consistently attend classes. Yousof always seeks assistance when required, and manages his time properly. He allocates enough time for studying for tests and exams. Collaborating, sharing ideas, and helping each other are the qualities that help him to lead group work where each member handles his responsibility and benefits from each other's strengths.

Yousof is an independent thinker. He often comes up with solutions for problems. His critical thinking and ability to think outside the box assists him to solve various problems. Moreover, his curiosity involves not only asking questions but to visit libraries and use the internet to research for the information he needs.

It is clear that Yousof has a deep interest in the connections between subject areas. He is always enthusiastic and eager to learn as much as he can about the applications of mathematics. Yousof's intellectual interests are by no means restricted to Science and Math. He plays an important role in social activities for community service. He helped in preparing and delivering food during Ramadan. He also enjoys practicing sports such as football and volleyball for his health and fitness, and for shaping persistence and determination as sports can help in building trust in oneself and developing self-esteem.

Any university would be happy to accept Yousof as he is a good student with much to offer. He embraces constructive criticism and strives to improve in every aspect of his education and beyond. He deserves all the good things that will inevitably come his way in his post-secondary years.

Sincerely,

Nour Chaalan
