Finance has been gaining my attention from an early age. Since I was 12 years old, I have accompanied my father to his own business. I learned considerably from him that created inside me a love of trade, investment, financial science knowledge, and management methods. At present, I have my own business. I have applied everything that I have learned by education or experience to my foundation. In addition, I will learn more to develop my personality and work. Developing myself by academic studying, books reading, news following, and work experience are extremely important to reach my purposes.

Education is the optimum key to knowledge. In the second year of my high school, I chose the business and administration path to be my major. I am excellent with numbers and scored 97 out of 100 in the GAT exam math section. GAT is a requirement exam to get a university acceptance in Saudi Arabia. In September 2007, I got my acceptance at Al Imam Muhammad Ibn Saud Islamic University. Studying at the university prompted me to attend training courses and scientific seminars to improve my skills and knowledge. In January 2012, I achieved my university certificate in Banking Management. In June 2014, I earned my Diploma certificate in English language from University Of California, San Diego (UCSD). For me, it is important and influential to continue learning and follow incoming updates. Yearly, I read several books on finance, investment, financial markets, and startup businesses. I believe that the news is one of the most important elements of the markets so I follow them carefully and deeply.

Implementation is the real experience in my perception. Positive results are evidence of success. I am eager to work in various places to get more experience. I have been working with my Father for nineteen years. When I was a university student, I signed an eight-month contract with a government ministry. Moreover, I acquired an opportunity to work with small establishments. From March 2015 to March 2017, I got a function in the biggest bank in Saudi Arabia named Alrajhi Bank. This job increased my cognition and skills in finance institutions. In January 2015, I established my own business. In the beginning, the business was very small. Right now, my foundation is divided into two types of businesses. First, financial investment, which works into the Saudi stock market, and lending small companies. Second, services provided as outsources for small companies, majored into finance consulting, accounting, human resources, and administration.

Education grows the knowledge, skills developed by experience. The sciences of Finance is a love that occupied me for years. Obtaining a master degree in sciences of Financial will move me to a higher stage. I will be better at thinking, understanding, explaining, innovation, and many uncountable things. Earning this knowledge and this certificate will incrementally influence my business and personality.
