To Whom It May Concern:
Re: Yasmeen Wassim Khashoggi
Date of Birth: 10 November 2005

I am pleased to write a recommendation letter for Yasmeen Khashoggi. I have known Yasmeen for the past two years, having served as her MYP Science Teacher and DP Physics teacher at Jeddah Knowledge International School. I believe that Yasmeen would be an excellent addition to your undergraduate program.

As a student, Yasmeen is a very hard worker. Whenever there is a new concept taught in class Yasmeen is always focused and she always practices on her own at home which made a huge difference in her knowledge and skills. Even the most complex of concepts taught in class didn't prevent her from trying her best to fully understand them. The topics included are Mechanics, Errors and Uncertainty, Circular Motion, Thermal Physics, and Electricity. Knowing that Yasmeen will be going over more advanced topics in grade 12, I am sure she will not find any difficulty since she takes her academic success very seriously and works hard to always be ready and prepared for any academic task. Yasmeen has superb problem-solving skills that are a pleasure for any teacher to encounter.

Yasmeen also excels in extracurricular activities. Her participation in MUN made her more confident in public speaking as Yasmeen is a very active student in the club and always has her opinion on any matter under discussion.

Yasmeen is a trustworthy, reliable, good-humored student and friend who supports others. She was a pleasure to have in class, and her positive attitude and belief in herself, even in the face of difficulty, is an immensely admirable asset. I am confident that she will continue to demonstrate the same diligence, perseverance, and optimism that she showed me and her peers.

Yasmeen would bring much to your college, both inside and outside the classroom. It is for these reasons that I highly recommend Yasmeen to your institution.

Kind Regards,

Robina Srouji
IB DP Physics Teacher
