

WICHITA STATE
UNIVERSITY

COLLEGE OF ENGINEERING

Department of
Electrical Engineering
and Computer Science

October 12, 2017

To whom it may concern,

I am writing this letter of recommendation to Mr. Fahd Alsharari who is a B.S. in Electrical Engineering student at Wichita State University. I have known Mr. Alsharari for last two years in the capacity of Institution of Electrical and Electronic Engineers (IEEE) – HKN (Honor Society for Electrical Engineers) Wichita State Chapter faculty advisor.

Mr. Alsharari was invited to join the Department honor society based on his academic achievements in Fall 2015. Upon joining the honor society, he has been one of the very active members. He has been involved in many activities. The following show his commitment to serve his professional community:

- He has been serving as the Director of faculty activities since Dec. 2016. As the director he has organized two workshops and two faculty-student brownbag lunches. This provides informal time for faculty and students to engage in profession related discussions.
- He has been supporting our tutoring program as a volunteer tutor for last one year. He attends is very punctual and has been helping several students with their academic challenges.
- Our chapter received \$ 10,000 from IEEE in Engineering Projects in Community Service to modify ride-on cars for children with disability. He has been serving as the Family Relations Officer for this project. He has been very active in interacting with the families and explaining the project to the parents and providing necessary assistance.
- He is also leading a team of five students to modify a car which will be used by a 3-year-old child with disabilities.

During this period, I have observed his enthusiasm for learning. He has been very dependable and provides his best to the society. I am confident that he will be an excellent professional engineer in the future and lifelong learner.

Sincerely,

Visvakumar Aravinthan,
Associate Professor,
Department of Electrical Engineering and Computer Science,
