

Recommendation Letter for Turkey Al hargan April 19, 2023

At a personal level, Turkey is a well-disciplined and industrious student with a pleasant personality. He goes well beyond the course requirements in the quantity and quality of his projects. He is well known to me from middle school to high school as I have been teaching him from grade 9 to grade 12, as a science and a physics teacher. He demonstrates his oral articulateness in discussion sections that are an integral part of the physics course. Turkey is highly proficient in applying the course material in analyzing the problem situations. He always explains his views well and in a concise matter, giving supporting arguments that are both clear and persuasive. Turkey also demonstrates good teamwork skills in group assignments and shows leadership ability by participating in giving classroom presentations, leading aspects of whole school assemblies.

Throughout the course, Turkey demonstrated great perseverance and initiative. Not only was he interested in and motivated to learn the course material, but he also put great work into assimilating it to his own experience and developing his own ideas about the deep understandings of the topic specifically for physics and mathematics which will help him in succeeding the required targets in STEM at any prestigious university with more effectiveness.

Turky has excellent communication skills. His written work is both clear and concise.

In addition to his academic and research performance, Turkey also interacts well with his colleagues. He is an articulate, polite, informed, and motivated young man. He has a strong determination about his targets and always demonstrates it by showing meticulous consistency in this regard which make him different from his peers, both in academics and extracurricular domain.

Turky has shown an immense interest in extracurricular activities. He participates in basketball and football team events and is an outstanding performer. Turkey is also an active member of the student council committee and has done much to benefit the school.

One of Turkey's characteristics is that he is a bonafied student. He is a student of strong character and attitude. He is a good example to his fellow classmates and to his juniors.

Turky is an outstanding student with god gifted abilities and composed character. I am sure he has a very bright future ahead of him, specifically in the field of electrical engineering which is directly related with complex processes and applications of integrated systems. He is a valuable asset not only to our institution, but to any other institution he joins in the future.

Best regards,

Adeel Akhtar: Physics Teacher

M.Phil Physics

IbnKhalidun International School (Boys Section)

Riyadh - Saudi Arabia
