To whom it may concern,

It is my pleasure to recommend Mr. Ali Sameer Ismail for admission to bachelor program of Electrical Engineering. I am an Assistant Professor of Electrical Engineering at the College of Technology At-Taïf. I came to know Ali while teaching him in diploma program at the previous mentioned college. Ali was one of the best students that I have taught in the college. Other instructors in our department speak highly of him performance in their classes, as well.

Overall, Ali is intelligent and has good problem-solving skills. This is reflected in him grades of the course, which were among the highest in the class, especially in the field of electronic/ electrical circuits and automatic control. Ali accomplished all tasks with great initiative and with a very positive attitude.

Ali has excellent communication skills. His written work is concise and extremely organized, as well as interesting to read. He demonstrated a high verbal communication skills in the course discussion and when resolving problems in the board. Moreover, he has good teamwork skills in group assignments and he has a special talent working with the students who need more guidance and support.

At a personal level, Ali is well disciplined, industrious with a pleasant personality. Throughout the course, he demonstrated great perseverance and initiative. All time, Ali is motivated to and interested in the material.

Certainly, Ali is an exceptional candidate and he would be an extremely positive asset to your program and I recommend him to you without reservation. If you have any further questions with regard to his background or qualifications, please do not hesitate to contact me.

Sincerely,

Dr. Abderraouf GAALOUL
