// My goal

To specialize and excel in electrical engineering, acquiring the necessary knowledge and skills for designing, analyzing, and operating electrical systems and circuits. This includes contributing to fields such as electrical power, communications, automation, and control, as well as providing innovative solutions to engineering problems and contributing to technological advancements and improving the quality of life.

// EDUCATION

- 09-01-2013
23-08-2013 ● I studied at Sicily high School in tenth grade and successfully graduated.
- 05-05-2014
17-02-2017 ● I transferred to the Industrial Secondary Institute, where my tenth-grade studies were recognized. I then completed both the eleventh and twelfth grades at the institute, in field of Electrical Construction Under the supervision of the General Organization for Technical and Vocational Training
- 04-03-2017
01-01-2020 ● Then, completed a diploma in technical electrical engineering in the field of electrical power under the supervision of the General Organization for Technical and Vocational Training

// EXPERIENCE

- Saudi Electrical Company Maintenance Department
(3 months of cooperative training)
- Al Qalaa General company ACGC for 5 months

Ismail Ali Sameer A , after graduating

"After graduating from Technical College in Taif, my primary goal was to further my studies in the field of electrical engineering and enhance my scientific and practical skills.

01-01-2020 To 01-02-2021

During the COVID-19 pandemic, Almost most of the activities were closed ,I utilized my time to learn English independently, primarily through YouTube videos, particularly from Mr. Ibrahim Adel on the Z American English Channel , I have immersed myself in watching numerous videos that have brought about significant changes in me, both in terms of religion, society, culture, and science. I am a different person now compared to who I was before the quarantine.

21-02-2021 To 21-06-2021

Subsequently, I joined Zoom, where I participated in sessions led by Mr. Werner Van Rooyen for a period of four months. These sessions were supervised by the Technical and Vocational Training Corporation.

01-07-2021 To 10-08-2021

After the pandemic subsided, I briefly worked as a seller of spare parts for mobile devices for a period not exceeding two months.

01-02-2022 To 15-02-2022

Following that, I had the opportunity to work with the Saudi Golf Federation as a host for international players from various nationalities. My responsibilities included receiving them at the airport and accompanying them during their stay in King Abdullah Economic City. This position was seasonal in nature.

15-03-2022 To 23-02-2023

One of the significant tasks I successfully completed was overseeing the restoration, electrical, and plumbing work for my aunt's two-story building. I sought advice from experts to ensure the project's success.

01-11-2022 To 20-03-2023

Concurrently, I joined ACGC company and spent five months there, and They gave me a lot of advice in dealing with the difficulties I was facing at my aunt's house.

However, I never lost sight of my primary goal, which was to complete my bachelor's degree.

During my tenure at ACGC company the Government of the Kingdom of Saudi Arabia announced the provision of external scholarships for students. I decided to resign from my position after saving a sufficient amount of money and applied to Sparta Academy in the Philippines to pursue my studies and achieve a high score in the IELTS test by October 2023.

Throughout this period, I continued to engage in my favorite hobby, football, which I have been passionate about since my early years. I played regularly with a team and participated in various amateur-level tournaments. I even had the opportunity to give interviews to the press, and some of my goals were recorded and shared on the YouTube platform. Additionally, I made sure to maintain my fitness and muscle strength by regularly visiting the gym to prevent injuries and improve my performance.

Recently, I developed an interest in fast bicycles and purchased a road bike. I have participated in several races at the national level in the Kingdom."

As I look ahead, I am excited about the opportunities that lie before me. With a strong foundation in electrical , a dedication to lifelong learning, and a commitment to pursuing my passions, I am confident in my ability to make a positive impact in my field and beyond.

Thank you for accompanying me on this journey, and I eagerly anticipate the future with optimism and determination."
