TO WHOM IT MAY CONCERN

On behalf of the Airworthiness Engineering & Planning Department at The Helicopter & Jet Company (THC), it gives me a great pleasure to write this letter of recommendation to Eng. Mohammed O. Osman, as he completed 12 weeks training/ working within the department.

Eng. Mohammed has shown several distinct characteristics that sets him apart from other trainees/ volunteers that we have hosted in the past. He is very polite, humble, respectful of others, and eager to learn. He has shown superb attitude towards learning and practicing what he has learned at the university. In addition, he is a good listener and pays attention to instructions and details. He is not afraid to ask questions and tries very hard to search for answers and not rely on others to “spoon-feed” him information.

Eng. Mohammed has been volunteering to supporting us within the department, yet he has never been late or missed a day of work. He has been able to gain the trust of the staff to the point where he was able to carry work by himself, as he reviewed fleet packages, records, and maintenance forecasts/ plans. In addition, he had engaged in projects of rectifying backlog records and digitally transforming them.

In the end, AEP department is very grateful for the hard work and dedication that Eng. Mohammed since his start with us and we wish him all the best in his future endeavor, as he has shown a promising carrier as he sets high level of candidacy.

Sincerely Yours,

Dr. Maher G. Gasim

Director – Airworthiness Engineering & Planning
