

personal statement

I am Ahmed Musa Madkhali, a fresh graduated industrial engineer who is passionate about development and learning, Recipient of the third-place innovator award at the Scientific Forum of King Abdulaziz University in the field of entrepreneurship and a grade point average of 4/5 and I am eager to apply my knowledge, skills, and abilities in the next step of my live.

The reason for applying is not only self-development, learning and strengthening capabilities, but also to enjoy Studying is very enjoyable thing for me and my educational aspiration is very ambitious, I want to apply for my master's degree, my goal is to study the doctorate. The reason for choosing industrial engineering is that we are interested in everything that has numbers, live cycle and cares about improvement and development, grew and create new ways and new engineering solution, this is the purpose of human existence and I love the major so much and I want to complete all of my studies and career in the industrial engineering.

Arizona state university I am an intelligent individual and I know that I can succeed in college. I am a high achiever with an unusually strong work ethic, which will make me an excellent student. These qualities, combined with my academy career that has given me a solid foundation will make me stand out among other applicants to the Engineering College at Arizona State University.
