

To Whom It May Concern

Subject: **Mr. AHMED MUSA MADKHALI**

I have known the above named as a student in The Department of Industrial Engineering at King Abdul Aziz University for nearly four years or so. I have taught ahmed subjects including Manufacturing Processes, and Design of Manufacturing systems and Computer Integrated Manufacturing. I could easily say that Ahmad a starightforward A+ student; ver disciplined, dedicated, hardworking and a very well mannered person.

During that period, especially throughout the course of his gradution project Ahmed proved to be very keen on learning and developing his skills and knowledge. He also has several qualities including teamwork, communication skills as well as willingness to for further education.

I believe Ahmad will sure be successful in puruing a further study program and do recommend him for such an endeavour and wish him all the best.

Sincerely yours

Dr. Abdul Kareem Abdul Jawwad
Associate Professor, Manufacturing and Industrial Engineering
Industrial Engineering Department
King Abdul-Aziz University, Rabigh
