

Abdulelah Alabdulwahed

MSc in biomedical science

01 / 04 / 2023

Personal Statement

My name is Abdulelah Alabdulwahed. I am applying for MSc degree in biomedical Science, and I am willing to continue my professional specialty in biomedical Science. I complete my bachelor degree in veterinary medicine and animal resources college at king faisal university, Saudi Arabia in May 2018, also I complete 4 intensive months working as doctor of veterinary medicine (DVM) at veterinary technique hospital, Saudi Arabia, al hassa city. In addition to that I studied a general English language for 2 years start from level 2 until level 8 in Saudi Arabia at Berlitz Institute.

I start working in Saudi Food and Drug Authority (SFDA) in November 2018 as doctor of veterinary medicine (DVM) for 1 year, after that working as laboratory specialist for 3 years. I got a promotion in 2023, then start working as laboratory expert until this moment.

I am passionate about science and medication – vaccination – biotechnology sciences which focus about human and animals' life. I have vast experience of studying and working in filed. As I want to connect my life with the mentioned filed.

I want to learn about innovative methods and different types of treatments such as: medication and developed vaccines that are used for treat human and animals, in addition to that to knowing their dangers, and how to use them correctly and how to ensure their safety and security because they will go to the patients, also, I would like to learn from the scientist and partitioners who are experienced in this filed. Therefore, I am convinced that the skills am going to learn at biomedical science course will allow me to help the community how to stay healthy.

Admittedly, I feel like the university is the perfect opportunity to learn the basic set of skills for my future profession. Their renowned publication and vast knowledge will benefit me as a learn and a professional, as they are an example to follow. Moreover, the diversity policies of the college are perfect, as they offer people of all genders, races, and abilities a chance to study. I would be proud to be a part of this place with its people who will experience different cultures with me. Undeniably, this approach will significantly benefit all the participants in the learning process by developing their interculture skills and tolerance.

As for my background, I grow up in a big family in Al hassa city, Saudi Arabia. All of my family members have higher education; without a doubt, my family taught me how to achieve my goals by studying hard and having faith in my abilities. I participated in my activities that follow my job such as world veterinary day 2018, would rabies awareness day 2018 & 2019.

Nowadays, I am laboratory expert at SFDA, Saudi Arabia which focusing about, animal observation, disease diagnosis, animal treatments, daily veterinary health monitoring, and in-vivo conducting test for drugs and vaccines control to ensure their safety according to different guidelines such as WHO – Pharmacopeia. I took courses about introductory of laboratory science, university of Zurich, Switzerland, also, potency of diphtheria – tetanus – pertussis vaccine, Indonesian FDA. Addition to that, I teach the university students many valuable skills. Namely, under my guidance they learn, how to handle animals, what kind of vaccines and how they work in human and animal body, also, knowing different types of tests that are used to examine human and animal medication and vaccines. Thus, my current work experience will allow me to study in the mentioned filed effectively and put my knowledge into practice.

Overall, my personal qualities, as well. As study and work experience, well allow me to study the chosen specialty effectively. Surely, the college will be the perfect place to receive knowledge. I strive to be a part of the SFDA researchers and have a passion and diligence to learn and research, as well as strong motive and succeed in my journey.
