Re: Letter of Recommendation for Tala Massto Nassar

Dear Sir / Madam,

I have been asked to supply a Letter of Recommendation for Tala Massto Nassar with respect to her applications through UCAS.

Tala was a personal tutee of mine throughout her time at Liverpool John Moores University (from September 2020 to June 2022), when she was a student on the Master of Pharmacy programme. We maintained regular contact throughout this time (on-line when necessary and in person when permitted) within tutorials as well as formal teaching sessions. I found Tala to be a polite and courteous student who got along well with staff and fellow students. She worked well in both group exercises and on individual assignments.

The Master of Pharmacy programme covers all aspects that are relevant to training as a UK-registered pharmacist. This includes a solid foundation in the fields of pharmacology and chemistry, as well as in depth studies of medicines, mechanisms of drug action, biomarkers, diagnostics, drug formulation and use. Tala has therefore acquired a considerable level of knowledge in these areas and has expressed a keen interest to continue studying in a health science related discipline. Tala possesses a relevant academic background for such courses and has shown the ability to work responsibly and independently.

I am sure that she will demonstrate commitment to her studies on the programme and has the capability to be successful on her chosen course, particularly as there are complementary elements to the topics she has studied previously. I therefore have no hesitation in recommending her.

Yours faithfully

Judith Madden
