

Personal Statement

I am Suha Zaghfi graduated from Anglia Ruskin University, UK, I have obtained a Bachelor of Science with honours in international nursing studies. I have a diploma of General Nursing from International Academy for Health Sciences in Gizan, Saudi Arabia in year 2009. I have learned many things about different topics from an international perspective, which I believe it will help me a lot in my future career. I have met many "students from all background and worked with them in a form of groups, we participated in seminars and power point presentations about several topics. I have also participated in a number of activity in the university, such as, joining a student club as I was a member of the Student Union as well as organising my own club which was called "the Arabic Society Club". This club aimed to support international student studying in the university, especially those from the same background as me.

I would like to apply for this course that stems from my interest in continuing higher studies. "Critical Care" is a very important subject to me as I believe that I will gain numerous amount of knowledge and information that are related to my career in the future. By applying for this course, I am hoping to follow my dream in learning more about this subject and gain more in-depth information that is related to it. I have been working as a staff nurse specialist in Sabya General Hospital of Ministry of Health in Gizan for 13 years. Nursing, in my opinion, is a career where you never really finish training. It is a highly demanding career that brings new challenges every day, but with it comes many rewards and a real sense of job satisfaction.

I am motivated employee, well organized, very punctual, and extremely cooperative in all aspects, and the desire to develop myself which will be reflected on my career.

I am sure that your university will be the place for me to channel my profound interest and fulfil my dreams. I hope, by joining this program, that I will achieve my professional career objectives and academic goals. My future plans include going back to the UK to pursue my graduate studies. Then, coming back to Saudi Arabia for hands-on fieldwork as nursing.

My hope is that your consideration of my file will render a favorable decision. I am confident a decision like that will definitely change my life and put me on the verge of a bright future of which I hope your school will be the main thrust.
