

TO WHOM IT MAY CONCERN

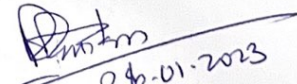

Mr Abdulilah Mohammed Alqasem is known to me for the past seven years since he was a student in the Department of Mathematics. I had the opportunity to teach him various courses in Mathematics such as Real Analysis, Topology, Rings and Fields apart from teaching him the principles of Visual programming for mathematics students.

During the course of his tenure as a student of the department, I always found Mr Abdulilah a very kind, cooperative and sincere student completing all assigned task in a time bound manner. Nor only this, he always maintained cordial relationship with his fellow students and other faculties of the department. I always founding him extending a supportive hand for all activities of the department.

Even after graduation, as a customer of the Bank where he was employed, I watched him dedicated to his work maintaining the work ethics, honest, sincere and serving the customers with a smiling face. I wish him all the very best in his future endeavors including higher studies and employment.

In case of any further queries, feel free to contact me.
