Admissions Committee

Dear Admissions Committee, I am writing this letter to support Wadiah Saeed F Kashkash application for renewable energy engineering.

I am delighted to recommend my friend and former classmate Wadiah Saeed F Kashkash to be a student at your university. Wadiah and I studied together at Imam Abdulrahman Bin Faisal university for two years. At that time, we became close inseparable friends.

Wadiah's interest and aptitude in science and mathematics have grown profusely over the past few years as she permanently seeks logical solutions to everyday problems and is enthusiastically taking up new challenges. The curiosity that she had led her to investigate how things functioned, which often left her fascinated by science, particularly energy, which lay hidden in the contraptions.

Wadiah's love for studying is evident in her determination. In addition, her ability to bear the pressures of study. One of her essential qualities that fascinates me is her cleverness in all subjects. Professors praise her for her superiority over all students.

Her passion and ability to obtain the highest scores in all scientific subjects and her ability to solve complex mathematical problems and understand perceptions and how energy works and how to acquire it from environmentally friendly sources as well as her interest in improving daily habits to maintain a cleaner and better environment make her a suitable student to study renewable energy engineering at your university. Consider the previous experience obtained throughout studying at Imam Abdulrahman Bin Faisal University for two years, thus proving her abilities and intelligence by achieving a GPA of 4.7 out of 5. Her distinction is not limited to academic consideration, as everyone acknowledges her kindness and assistance to her class students. Wadiah has goals and ambitions to improve the environment and the planet. Therefore, I can personally prove and acknowledge that she is a student who deserves the opportunity to complete her studies at the best universities to achieve her vision of a cleaner world.

Please feel free to contact me at mflhani@gmail.com for any questions or clarifications you may need.

Yours sincerely,

Marwan H F Almasre
