

**To Whom It May Concern,**

It is a great pleasure for me to recommend Amaal Al Nujaim for study on your undergraduate programme.

I had the pleasure of being Amaal's mentor during her summer internship at the School of Humanity, where she was tasked with designing a space habitat in the Venusian atmosphere. Not only did she deliver an exceptional presentation, condensing complex scientific ideas into a digestible format, she also took the initiative to write her own research paper exploring technological strategies to overcome the challenges of sustained human respiration in the Venusian atmosphere.

Throughout the internship, Amaal displayed immense enthusiasm, intellect, and resilience. She voluntarily went above and beyond, exceeding the requirements of the brief, in addition to pioneering innovative new ideas on her research paper. While working through her presentation, she always accommodated for my schedule and came prepared with questions and insights to ensure our time was spent effectively. Amaal is organised and thoughtful in her approach, and she brings an infectious energy to her work. With these qualities, I am highly confident that Amaal will be a valuable asset to any team, including your undergraduate programme.

If you need any more information, please do not hesitate to contact me at (+44) 7397899929. I would be more than happy to expand on my recommendation.

Best regards,

**Rohith Muhundan**
