

Dear Admissions Committee,

I am writing to express my strong interest and desire in pursuing higher education at your esteemed university. My name is Abdulmohsen Alhawas, standing on the threshold of my dream career, I am eager to contribute my skills gained through academic achievement and voluntary caring, such as progressive thinking, communication, and compassion.

During my primary grades, I had the incredible opportunity to study in the United States, specifically in Boston. This early exposure to a different educational system left an impression on me. It ignited my curiosity and passion for knowledge, setting the foundation for my academic journey. I have obtained a variety of skills during my time in the United States which lead me to go through the culture of the foreign world.

In my pursuit of knowledge, I have achieved a certificate in Artificial Intelligence, specifically in SDAIA, the Saudi Data & AI Authority. It has further fueled my passion for emerging technologies and their potential to transform industries. This certification has provided me with a solid foundation in the field and a desire to explore its applications and advancements further.

Outside of academics, photography has become a significant hobby of mine. It yields me to another dimension which comforts the human mind and gives me time to enjoy the wonders of nature. It allows me to capture moments and express my creativity. Photography serves as an artistic outlet that complements my analytical mindset and provides balance in my life.

Throughout my academic journey, I have always strived for perfection, yet human beings are incapable of achieving it. Pursuing what your ambition is will certainly lead you to attain it. This drive to perfection comes from the support and encouragement of my family and their belief in my abilities. I am a person who always looks forward to reaching their full potential and will certainly achieve it.

While reading the book “The Rules of Life” by Richard Templar, rule number 20 caught my eyes. It states, “Don’t be afraid to dream.” It made me question what kind of life I would desire to live. And I chose the life of obtaining excellence in myself and enjoying the moment I live in.

While thinking of a field to learn, I chose the field of Artificial Intelligence because it is the future of the universe. Immersing technology is constantly evolving to achieve a comfortable society for human beings to live in. This field suits me personally since it requires determination and mindfulness. I aim to develop the necessary skills and knowledge to make a meaningful difference in this field.

Throughout my visits to Singapore, Malaysia, and Thailand, I have been fortunate to experience the rich cultural diversity, breathtaking landscapes, and warm hospitality of these Southeast Asian countries. This gave me a chance to obtain knowledge elsewhere and witness different regions of the world.

In conclusion, I believe that my academic achievements, passion for emerging technologies, commitment to excellence, and drive for a successful future make me an ideal candidate for admission into your university. I am confident that by joining your institution, I will have the opportunity to further cultivate my skills, broaden my knowledge, and work towards achieving my goals. Thank you for considering my application, and I look forward to the possibility of being a part of your esteemed institution and to help add to its already great reputation.

Sincerely,

Abdulmohsen Alhawas
